95th Annual Conference and Exhibition

Ten Reasons to Join Us in Baltimore

It's almost June, which means it's time for our Annual Conference & Exhibition in Baltimore, MD (June 23–27). For any procrastinators who haven't yet made plans to join us, we hope to make your decision easier with this list of the top ten reasons to attend.

In no particular order—

- Keynote address by U.S. EPA Deputy Administrator Linda Fisher, on how recent events are changing the environmental profession.
- An excellent series of panel sessions on current topics, featuring high-level policy-makers and industry representatives. Topics include environmental and health responses to emergencies, multipollutant legislation, new source review, the “MACT hammer,” and global warming.
- An outstanding technical program, featuring nearly 500 technical paper presentations in 125 sessions.
- An exhibit hall featuring more than 350 companies and service providers, as well as the New Product Technology Theater, International Innovative Environmental Technology Pavilion, and new Government Pavilion.
- Crabcakes, shopping, and history! Baltimore's Inner Harbor offers a variety of fun and educational activities, especially in the summer.
- The 4th International Urban Environmental Infrastructure Forum, focusing on critical air quality issues facing developing countries.
- The 2002 Critical Review on visibility, presented by Dr. John Watson.
- Special programs on brownfields and pollution prevention.
- Networking opportunities galore, including receptions, luncheons, and technical tours.
- A night at the ballpark—Watch the Orioles take on the Yankees in beautiful Camden Yards stadium.

Of course, there are many more reasons than the ones listed above. Please visit the official conference Web site for more details if you're still not convinced, please browse the links at the left for more information. See you in Baltimore!
