by Mary F. McDonald, Terry Mors, Ann Phillips, and John Phillips

Environmental Sciences and Environmental Computing, Volume I

 This [CD-ROM](#) is the first of a series of electronic books focusing on environmental sciences and the use of computers to understand, simulate and predict environmental phenomena. The book is fully hypertexted and contains eight technical chapters and other information. Text, equations, and graphics are presented in Adobe Acrobat format. The Adobe Acrobat Reader software (version 3.01) for a wide variety of systems is included in the CD-ROM.

Urban Air Pollution: Athens 2004 Air Quality

 This [CD-ROM](#) is an electronic book on urban air pollution dealing with the case study of Athens, Greece. Because of its potential adverse effects on a large number of people, urban air pollution today is perhaps the most important environmental challenge. The Athens smog, in particular, has been studied for decades by a team of outstanding Greek and international scientists. The book is fully hypertexted and
