YEALINK EX. 1027

Special local promotions will include sponsored subscriptions or vouchers to online content providers such as Eurosport Player and MegaVideo, among others.

EZAir's products wirelessly stream the entire computer screen to a TV or projector in Full HD quality, with 5.1 surround sound. Backed by Wisair's Ultra Wideband Wireless USB technology, EZAir allows online video and music enthusiasts to enjoy movies and sports in HD resolution, surf the entire web on their TV, interact with online content, or work while using their favorite screen – whether a television or projector – from the comfort of their couch.

The products operate via a Plug&Play USB dongle that plugs into a USB port available in any PC/Laptop and an adapter that connects to the target device (such as flat TV, speaker system or PC peripherals).

EZAir Wireless' product line includes the EZView, and EZView+, which transmits up to Full HD video; the multi-tasking EZDock, which is also a wireless docking station; and the EZVibe, for audiophiles, to transmit music from their vast PC collections to their favorite sound system, wirelessly.

EZAir Wireless products are available online at www.EZairWireless.com and are priced in the range of 69 to 149 Euros.

Introductory promotions are available:
