**Warm reminder: All students must be cautious when looking for jobs, distinguish the authenticity of information, and beware of being deceived. If you encounter irregular recruitment practices such as employers charging any fees or withholding documents, please terminate the recruitment immediately and inform the Employment Guidance Center (010-89733499) of the situation. We wish the graduates good luck in their job search!**

Position category: Communications technology engineer

Recruitment number: 300 people

Work experience: No limitation

Language requirement: No limitation

Contact person: Teacher Li

Contact person's phone: 027-6\*\*\*\*000 (log in to view contact information)

Required specialty: [PhD] in chemistry, or [bachelor's degree] in materials science and engineering, environmental engineering, environmental science or statistics, or [master's degree] in information and communication engineering, chemistry, mathematics, materials and chemical engineering or physics

### Position Details

Yangtze Memory Technologies Co., Ltd.  
2025 Spring Campus Recruitment Introduction

Yangtze Memory Technologies Co., Ltd.

Nature of organization: State-owned enterprise

Industry of organization: Manufacturing

Size of organization: 5,000 - 10,000 people

### Other Positions

Yangtze Memory Technologies Co., Ltd. was established in July 2016 and is headquartered in Wuhan, the "River City". It is a memory IDM enterprise that integrates chip design, production, manufacturing, packaging, testing, and system solution products. Yangtze Memory provides global partners with 3D NAND flash memory wafers and particles, embedded storage chips, consumer-grade and enterprise-grade solid-state drives, and other products and solutions, which are widely used in mobile communications, consumer digital products, computers, servers, data centers, and other areas.

In October 2017, Yangtze Memory successfully designed and manufactured China's first 3D NAND flash memory through a combination of independent research and development and international cooperation. In September 2019, the second-generation TLC 3D NAND flash

memory equipped with Yangtze Memory's self-innovative Xtacking® architecture was officially put into mass production. In April 2020, Yangtze Memory announced the successful development of two third-generation TLC/QLC products. Among them, the X2-6070 model, as the first third-generation QLC flash memory, had the \*industry's\* highest I/O speed, the highest storage density and the highest single-chip capacity at the time of its release.

[Recruitment targets]: 2025 bachelor's degree, master's degree and doctoral degree graduates from home and abroad

[Campus recruitment positions]

Circuit design category:

Analog circuit and digital circuit;

Process technology category:

Process engineering, process integration, device development, and intelligent algorithms;

Engineering technology category:

Equipment engineering, plant engineering, and plant construction engineering;

System solutions category

Firmware development, product verification engineering, product hardware engineering, and mass production product engineering;

Quality and reliability category

Device physical reliability, NAND/SSD reliability, and failure analysis;

Marketing category

Application engineering;

Information technology category

Software development;

Functional support category

Supply chain management;

\*Positions are updated in real time. For more position information, please open the website <https://ymtc.zhiye.com> and click "Campus Recruitment" to view.

[What we can provide you]

By joining Yangtze Memory, you will enjoy:

(1) Preferred platform

18 years / 11 years of integrated circuit / 3D NAND research, development and manufacturing

More than 11,000 patent applications, more than 5,000 international patents, including 95% of invention patents, and 1,300 new patent applications each year

(2) Comprehensive salary

Scientific salary system: Salary system based on job level and ability, bonus incentives that reflect value contribution, competitive comprehensive salary package, annual salary adjustment, etc.

Comprehensive employee benefits: Social security five insurances and one fund, national statutory holidays, company benefits, annual leave,

supplementary commercial insurance, annual physical examination, birthday gifts, holiday condolences, team building funds, union activities, etc.

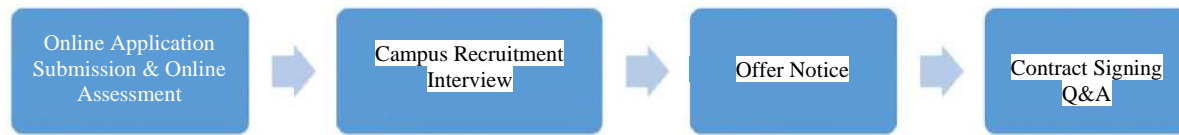

Enriched and colorful benefits: Super fitness center, employee apartments, high-quality kindergartens, primary and secondary schools

(3) Systematic training and development system

[text cut off]

Full cultural integration, role transformation, and competence in job requirements

[Application process]

[Submission Method]

Cell phone: Follow the WeChat official account “Yangtze Memory Recruitment” - select “Apply to Join” - click “Campus Recruitment” to apply for your desired positions;

PC: <https://ymtc.zhiye.com>, click “Campus Recruitment” to view all campus recruitment positions;

Note: Each student can apply for three positions, and priority will be given to the first choice.
