

- Farag, M.M. (2008). *Materials and process selection for engineering design* (2nd ed.). CRC Press, Taylor and Francis, ISBN 9-781-420-06308-0.  
*A materials science approach to the selection of materials.*
- Shackelford, J.F. (2009). *Introduction to materials science for engineers* (7th ed.). Prentice Hall, ISBN 978-0-13-601260-3.  
*A well-established materials text with a design slant.*
- Tabor, D. (1978). *Properties of matter*. Penguin Books.  
*This text, like that of Cottrell, is notable for its clarity and physical insight.*
