

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF TEXAS
MARSHALL DIVISION

STRATASYS, INC.,

Plaintiff,

v.

SHENZHEN TUOZHU TECHNOLOGY CO.,
LTD., SHANGHAI LUNKUO TECHNOLOGY
CO., LTD., BAMBU LAB LIMITED, AND
TUOZHU TECHNOLOGY LIMITED,

Defendants.

Civil Action No. 2:24-cv-00644-JRG
LEAD CASE

Civil Action No. 2:24-cv-00645-JRG
MEMBER CASE

JURY TRIAL DEMANDED

**DEFENDANTS' MOTION TO COMPEL DOCUMENTS RELATING TO
PRIOR ART SYSTEMS AND PRACTICING PRODUCTS**

Over six months after the Additional Disclosure deadline, **Stratasys has still not produced a single document describing any of its practicing products.** No documents have been produced for the products that Stratasys itself marked as practicing the Asserted Patents. Nor has Stratasys produced any documents for the unmarked products identified in Defendants’ *Artic Cat* letter.

Stratasys also has not produced any documents for two of the three prior art products identified in Defendants’ invalidity contentions—20 weeks ago. As for the third product, a handful of documents were produced the evening before the parties’ lead counsel meet and confer. Notably, only four of those documents were marked confidential. When asked if it could provide a date by which the other prior art products’ documents would be produced, Stratasys refused to commit. And when asked if it could agree to provide prior art source code commensurate to what the Defendants made available for the accused products, Stratasys balked once more.

In a patent action between companies with 3-D printer products, product documents are relevant to validity, marking, credibility, damages, and more. Yet Stratasys still has not meaningfully begun to provide this fundamental discovery. In fact, Stratasys has not produced much at all. While Defendants provided dozens of source code files and over 16,000 documents, Stratasys has provided no code and only 2,288 documents, with less than 200 marked confidential.

Hiding behind the facade of a “rolling production,” Stratasys has delayed or refused to produce routinely discoverable information on its: (A) prior art products, (B) practicing products, and (C) affiliate’s practicing products—documents that Stratasys has the contractual right to request. Defendants tried in vain to work with Stratasys for months, necessitating this motion.

I. FACTS

Stratasys asserts 10 patents related to 3-D printing against Bambu. Dkt. 1. And during the **seven months** since the Additional Disclosures deadline (Dkt. 34 at 6), Defendants have asked for

documents related to Stratasys's relevant 3-D printing products again and again:

- **In November 2024**, Defendants asked for documents related to Stratasys's practicing products. Ex. A at 1.
- **In February**, Defendants responded to Stratasys's statement that it "will not produce any documents related to" its practicing products, explaining why the documents were relevant in written correspondence and a meet and confer. *Id.*
- **In March, April, and May**, Defendants were forced to reiterate their requests for documents on practicing products and those that Defendants identified with specificity in its invalidity contentions **in January**. *Id.* at 1-2.
- **In June**, Defendants wrote to confirm Stratasys's positions on the documents sought in this motion and requested a final meet and confer. *Id.* at 3.

During these seven months, Defendants explained the relevance of their requests and provided Stratasys ample time to collect and produce. Stratasys, in contrast, repeatedly disputed the relevance of documents regarding **its own practicing products**. *Id.* at 1-4. And even for the prior art products that Stratasys agreed were relevant, Stratasys refused to commit to deadlines or provide source code. *Id.* at 4. Instead, Stratasys provided general statements about its progress, like its ongoing review of "terabytes" of data, but given seven months of similarly vague statements, Stratasys's statements have simply proven to be delay tactics.

Indeed, the facts tell a different story. Stratasys has still **not produced a single document pertaining to the functionality of its products marked as practicing an Asserted Patent**. For its unmarked practicing products, Stratasys first demanded that Defendants serve an *Artic Cat* letter before discovery could be warranted. After Defendants agreed, **Stratasys reneged**—stating that if "Stratasys does not dispute your assertion, then there is no need to produce any of the requested documents." *Id.* at 3. Nevertheless, Defendants stuck to their word and identified the unmarked products. Stratasys also delayed over 20 weeks before beginning production on its prior art products and refused to produce any documents on its affiliate's practicing products. *Id.* at 4. The parties thus met and conferred on June 19, resulting in an impasse and the present motion. *Id.*

II. ARGUMENT

A. **Stratasys should be compelled to produce documents and code showing its prior art products’ functionality, first sale, and financial information.**

Stratasys has only produced four confidential prior art product documents, all related to one of the three prior art products that Bambu identified in January. These products were identified in Defendants’ invalidity contentions with specificity, making them relevant to Defendants’ §§ 102 and 103 defenses and subject to production. *See LG Elecs., Inc. v. Hitachi, Ltd.*, No. 5:07CV90, 2009 WL 10677426, at *4 (E.D. Tex. Mar. 2, 2009) (compelling production of “(1) all non-privileged materials and documents relating to all of Plaintiff’s prior art devices for each of the patents-in-suit; (2) all of Plaintiff’s relevant source code for those products;” and more). Financial documents for these systems are also required under LPR 3-2(a) and are relevant to proving the date of first sale, as well as commercial success, which is a secondary consideration of non-obviousness. *See Apple Inc. v. Int’l Trade Comm’n*, 725 F.3d 1356, 1366 (Fed. Cir. 2013).

That Stratasys agreed to search for responsive material and “identified potentially responsive documents” in its internal search is insufficient because Stratasys refuses to provide a timeline for its production. This is untenable when the “case has been pending for nearly eleven months and” Stratasys “has been well aware of its discovery obligations as set forth in both the Discovery Order and the Docket Control Order.” *Weatherford Tech. Holdings, LLC v. Tesco Corp.*, No. 2:17-CV-00456, 2018 WL 4620634, at *2 (E.D. Tex. Apr. 27, 2018) (Gilstrap, J.). Defendants’ invalidity contentions were served in January, yet months later, Stratasys has produced a mere handful of documents for only one of the three products and no source code or financial information. *See id.* (compelling production six months after the additional disclosure deadline despite no dispute as to relevance or proportionality).

Despite demanding (and receiving) source code for all of the allegedly infringing products,

[REDACTED]

obtain documents from UltiMaker. *See Kamatani v. Benq Corp.*, No. 2:03-CV-437, 2005 WL 8131835, at *6 (E.D. Tex. Aug. 5, 2005) (“[T]he documents relating to the PBDS joint venture are (and always have been) within the control of BenQ for discovery purposes because BenQ has a 49% ownership interest in the joint venture.”). Indeed, the combination of its corporate ownership and UltiMaker’s contractual obligations “to generally do **everything possible** to aid [Stratasys] . . . to secure, obtain, defend, and enforce proper patent protection for the Inventions” gives Stratasys control over UltiMaker’s documents, as Stratasys is “defend[ing] and enforce[ing] proper patent protection for the Inventions” in this lawsuit. Ex. B (emphasis added). Assisting Stratasys in complying with its discovery obligations thus falls within the scope of “generally do[ing] **everything possible** to aid” Stratasys in its enforcement of the Asserted Patents.

When presented with these facts, Stratasys objected on two grounds, both of which are unfounded. First, Stratasys claimed that the cited provision “relates to ‘Inventions,’” without explaining why Defendants’ requests regarding conception, reduction to practice, validity, inventorship, and practicing products are unrelated to “Inventions.” Ex. A at 2. Tellingly, Stratasys has not produced any of UltiMaker’s “Inventions” documents, nor has it sought them.

Second, Stratasys demanded that Defendants engage in third-party discovery. But when Defendants did so, the same counsel that instructed Defendants to seek discovery from UltiMaker under Rule 45 then objected to the third-party subpoena on UltiMaker’s behalf, claiming it was too broad to impose on a third party. *Id.* at 2. Over two months have passed since Defendants served their subpoena, and not a single document has been produced. When asked to provide a date certain by which production will begin, counsel for Stratasys and UltiMaker refused, stating it was not “in a position to commit to one.” *Id.* at 4. Counsel argued “that searching for documents from many years ago is very difficult and burdensome for MakerBot” and “the overbroad requests

CERTIFICATE OF CONFERENCE

Pursuant to Local Rules CV-7(h) and CV-7(i), the undersigned hereby certifies that counsel for the parties met and conferred regarding this Motion prior to filing. On June 19, 2025, lead and local counsel for Defendants participated in a telephonic conference with lead and local counsel for Stratasy. The meet and confer ended in an impasse for the issues raised herein. Stratasy opposes the relief requested in this motion.
