Attachment: Neurala_presentation_nVidia_6_2017.pdf

Murali, Kashi, Jeff,

I attach a presentation for this week's meeting - Thursday 1:30PM.
The presentation has also some info specifically for Jeff regarding the fund raise, which in terms of timing may get an acceleration in the next couple of weeks, so good timing.

Jeff, if you want to sidebar this over the phone, happy to.
Thanks
Max

Hi Max,

Sure. I will send the invite soon for 1:30 p.m.

Thank you for confirming.

Sachiko

Subject: RE: possible Letter of support for a DARPA proposal

Sachico,

thanks, that would work, will give us more flexibility. Should we settle 1:30PM?
Copying Kashi in case he would like to meet, and Jeff to keep in the loop.

Thanks
Max

Hi Max,

How about June 29th sometime between 1-3 p.m. ?

Our address is Building L, 2820 County Highway G4, Santa Clara, CA 95051.

I am moving Mary to BCC.

Thank you.

Sachiko

Mary,

indeed, but last time we spoke, he told me 'next time you are in town let me know, we should meet in person'.
So I did...

Next time!
Max

Sachico,

have not heard from Mary. We can come on the 29th, but would Murali have any availability for the 29th later in the PM? We were aiming to fly out that AM from Boston.

Thanks

Max

Thanks Murali,

that would work. Just checking with Mary if Jensen is available around the 29th as well? I can be flexible with my travel plans.

Mary, do you have any availability?

Thanks

Max

Hi Max

Just an FYI.

I will be out of the country at meetings those particular days — its for a board meeting, so I can't change the date. So I will miss you.

So we will need to talk by phone, or meet a different time.

Regards,

Jeff

Hello Murali,

just making sure you got this as we are finalizing our travel schedule for the end of the month. Better for us 29-30.

Thanks

We would like to understand the technology and usecases you are targeting, We would like to get more technical understanding on some of the technologies you have been articulating so well. Some of my auto colleagues are also interested in your solutions.

Let me know when you and your team are available for a f2f discussions , the topics are Edge-Learning, Auto usecases and FIRST.

Regards

Murali,

while we wait for having a schedule in place for a visit... how about a call between me, you, and Warren, who is heading our initiative?

We understand you are donating TX-1s to FIRST and you have taken on the task of training up the high school kids on Deep Learning.

How's that going? We think we may have tools that are easier to understand and onboard these high school students onto TX-1s and we'd

be delighted to be helpful there, as discussed with Jensen.

Let me know.
Thanks

Max

Hello Max

Following up from the other thread as well, we need to meet and discuss your edge

learning technology and also the FIRST collaboration you have proposed.

Let me know how soon we can meet, Deepu is out of town next week. Monday 26th the following week will work for us. Let me know copying Sachiko to co-ordinate.

Regards

Murali

Kashi,

a clarification: we plan to use ISAAC as well as TX2 for the project with Darpa.
Spoke with Jensen at length about it.

Max

----- On Thu, 15 Jun 2017 06:48:47 -0400 **Massimiliano Versace**
<versace@neurala.com> wrote -----

Kashi,

We are putting together a proposal for DARPA:

<http://www.darpa.mil/news-events/lifelong-learning-machines-proposers-day>

This falls within our domain: continuous learning after deployment. We want to put this on Edge devices, and propose the next piece of tech that a DARPA project would seek to fund.

Would nVidia be willing to write a letter of support (the usual, non

binding, which simply states we like the tech and we will support the team, etc..)?

Thanks!

Max
