Re: Credo Technology Group, Ltd.'s Intellectual Property

To Whom It May Concern:

I represent Credo Technology Group, Ltd. and Credo Semiconductor, Inc. (Credo).

Credo is a global innovation leader in Serializer-Deserializer technology. Credo's novel designs have consistently broken through perceived technological barriers in the data infrastructure market, delivering industry-leading speed, power, and equalization in wired connections.

Credo is also the pioneer of a fast-growing new product category: active ethernet cables. Credo's distinctive purple HiWire™ Active Electrical Cables (AECs) are plug-and-play copper interconnect cables designed for affordable, lossless operation as an alternative to short, thick DACs and high-power, high-cost active optical cables for data center and telecommunications applications.

As an innovation leader, Credo is firmly committed to protecting and enforcing its intellectual property. Credo's AECs are protected by numerous issued patents and pending patent applications, including, but not limited to, the following:

U.S. Pat. No.	Title
10,877,233	Active ethernet cable with preset pre-equalization
10,944,584	Single-ended signaling between differential ethernet interfaces
11,012,252	Active ethernet cable
11,018,709	Active 1:N breakout cable
11,032,111	SerDes pre-equalizer having adaptable preset coefficient registers
11,137,550	Bypass switch for managing active ethernet cable
11,218,186	10-meter 100 Gbps copper wire ethernet cable
11,495,898	Connector paddle card with improved wiring connection geometry
11,552,873	Debugging arrangement for active ethernet cable

Amphenol Corp.
Sept. 1, 2023

U.S. Pat. No.	Title
11,581,913	Active 1:N breakout cable
11,646,959	Active ethernet cable with broadcasting and multiplexing for data path redundancy

Credo understands that Amphenol may be making, using, selling, offering for sale, or importing into the United States active electrical cables that compete with Credo's HiWire™ AECs. These activities may constitute unlawful infringement of Credo's intellectual property, including the issued patents listed above. In order for Credo to assess its rights, please identify any active electrical cables that Amphenol has made, used, sold, offered for sale, or imported into the United States, provide three samples of each such product, and provide product specifications or other documentation sufficient to identify the features and functionalities of each such product.

Thank you very much for your time and attention.

Very truly yours,

Sanjiv P. Laud
