

**CURRICULUM VITAE
OREGON HEALTH AND SCIENCE UNIVERSITY**

Name: Eric Roeland, MD, FASCO, FAAHPM

Date Prepared: January 30, 2026

Phonetic Spelling: "ERR-ik" "r-OH-L-ahn-d"

Pronouns: he / him / his / él

I. PRESENT POSITION AND ADDRESS

Associate Professor
Oregon Health and Science University
Department of Medicine
Division of Hematology/Oncology
Division of Oncological Sciences
Medical Oncology and Palliative Care
Knight Cancer Institute
Director, Symptom Science Research

Oregon Health and Science University
Knight Cancer Institute
Division of Hematology and Medical Oncology
3181 SW Sam Jackson Park Road, OC14HO
Portland, OR 97239

E-mail: roeland@ohsu.edu

II. EDUCATION

Undergraduate and Graduate

09/96 - 06/00	BA	Spanish Language and Literature	Northwestern University
06/01 - 06/05	MD	Medicine	University of Colorado Health Sciences Center

Post-Doctoral Training

07/05 - 06/06	Intern	Internal Medicine	University of California San Diego
07/06 - 06/08	Resident	Internal Medicine	University of California San Diego
07/08 - 06/09	Fellow	Hospice and Palliative Medicine	San Diego Hospice and The Institute for Palliative Medicine
07/09 - 06/12	Fellow	Hematology and Oncology	University of California San Diego

III. CERTIFICATIONS AND LICENSES

Certifications

08/08 - 12/18	Diplomate, Internal Medicine	American Board of Internal Medicine (ABIM)
01/10 -	Diplomate, Hospice and Palliative Medicine	ABIM Certified, Participating in Maintenance of Certification
01/13 -	Diplomate, Medical Oncology	ABIM Certified, Participating in Maintenance of Certification

Active and Past Licenses

01/07 - 12/18	Past	California Medical License	98796
03/08 - 04/27	Active	DEA, Schedule II-VI	Available upon request
03/18 - 12/22	Past	Massachusetts Medical License	273842
07/21 - 12/27	Active	Oregon Medical License	205107
01/23 - 01/25	Past	Basic Life Support	American Heart Association
09/23 - 12/25	Past	Washington Medical License	61413587

Formal Faculty Development

2014 - 2015	National Center of Leadership in Academic Medicine	UC San Diego	This program focused on junior faculty to develop skills for an academic career, implement a strategic plan, and network across the university.
2015	Supportive Oncology Workshop	Massachusetts General Hospital	I was selected as a participant in a week-long mentored workshop on protocol development.
2015	Vail Workshop Methods in Clinical Cancer Research	American Society of Clinical Oncology / American Association for Cancer Research	This mentored week-long workshop focuses on developing a clinical trial protocol.
2017	Advanced Certificate in Clinical Research	UC San Diego Extension Clinical Research Enhancement through Supplemental Training	This program focuses on training in research methods, application of these methods, and effective clinical research collaboration (20 units).
2018 - 2019	Education Scholar Program	American Society of Clinical Oncology	I was selected as a participant in the inaugural class of this ASCO international education and leadership program.
2023 - 2024	Oncology Educational Fellowship	Food and Drug Administration and American Association for Cancer Research	This year-long program focused on drug development and regulatory review, including an in-person mock Oncology Drug Advisory Committee (ODAC) meeting at the FDA White Oak Campus.
2025 - 2026	Mid-Career Clinical Leadership Development Program	Oregon Health and Science University	This year-long program enhances leadership skills for mid-career faculty by developing essential competencies, understanding leadership styles, and navigating the OHSU system effectively.

IV. PROFESSIONAL EXPERIENCEAcademic Appointments

07/12 - 04/18	Assistant Professor	Medicine Hematology/Oncology	University of California San Diego Moore's Cancer Center
05/18 - 04/21	Assistant Professor	Medicine Hematology/Oncology	Harvard Medical School Massachusetts General Hospital
05/21 - 06/23	Assistant Professor	Medicine Hematology/Oncology	Oregon Health and Science University Knight Cancer Institute
07/23 -	Associate Professor	Medicine Hematology/Oncology	Oregon Health and Science University Knight Cancer Institute

Administrative

06/12 - 07/18	Co-Leader	Palliative Care	University of California San Diego Moore's Cancer Center
06/12 - 07/18	Director	Symptom Management Research	University of California San Diego Moore's Cancer Center
07/21 - 05/22	Program Director	Melanoma	Oregon Health and Science University Knight Cancer Institute
07/21 -	Program Director	Symptom Science	Oregon Health and Science University Knight Cancer Institute
07/25 -	Program Director	Melanoma	Oregon Health and Science University Knight Cancer Institute

Hospital / Clinical / Professional Appointments

07/12 - 04/18	Assistant Clinical Professor	Internal Medicine Hematology/Oncology	University of California San Diego
05/18 - 04/21	Assistant in Medicine	Internal Medicine Hematology/Oncology	Massachusetts General Hospital
05/21 - 07/23	Assistant Professor	Internal Medicine Hematology/Oncology	Oregon Health and Science University
07/23 -	Associate Professor	Internal Medicine Hematology/Oncology	Oregon Health and Science University

Other Professional Positions

2014 - 2016	Member	Data Safety Committee	Cellceutix Corporation
-------------	--------	-----------------------	------------------------

2016 - 2017	Expert Witness	Alexander v. Scripps Memorial Hospital (Defendant)	Higgs, Fletcher & Mack Superior Court of California County of San Diego Central Division Case No. 37-2014-00016257-CU-MM-CTL
2016 - 2020	Member	Data Safety Committee	Galera Therapeutics
2017 - 2018	Member	Oncology Advisory Panel, Clinical Guidelines	American Imaging Management Specialty Health
2017 -	Member	Scientific Advisory Board	Napo Therapeutics (NCT04538625) 03/19 - Pre IND meeting 05/25 - FDA Type C Meeting
2019 - 2020	Member	Data Safety Committee	Oragenics
2020 - 2021	Chair	Data Safety Committee	Enzychem Lifesciences
2020 - 2021	Expert Witness	Chappell <i>ex rel</i> Estate of Chappell v. UCLA Medical Center (Defendant)	Fraser Watson & Crouch Superior Court of the State of California County of Los Angeles Case No. 19STCV01304 9
2021 -	Member	Scientific Advisory Board	Agilix
2021 -	Member	Scientific Advisory Board	Actimed Therapeutics
2022 -	Member	Scientific Advisory Board	Meter Health
2022 -	Member	Executive Steering Committee	Pfizer (NCT05546476) Phase II study of ponesegromab in patients with NSCLC, pancreatic, and colorectal cancer and cachexia
2023 - 2024	Expert Witness	Heron Therapeutics, Inc (Plaintiff) v. Fresenius Kabi USA, LLC	Paul Hastings District of Delaware Case No. 22-985-WCB
2024 -	Expert Witness	Heron Therapeutics, Inc (Plaintiff) v. Mylan Pharmaceuticals, Inc	Paul Hastings District of Delaware Case No. 23-1015-WCB
2025 -	Chair	Executive Steering Committee	Pfizer (NCT06989437) Phase II/III study of ponesegromab in patients with pancreatic cancer and cachexia
2025 -	Expert Witness	Heron Therapeutics, Inc (Plaintiff) v. Azurity Pharmaceuticals, Inc	Paul Hastings District of Delaware Case No. 24-830-WCB Case No. 24-1363-WCB

V. CONTRIBUTIONS TO DIVERSITY, EQUITY, INCLUSION, AND BELONGING

2015, 2016, 2017, 2018, 2020, 2024	Foro Internacional de Medicina del Dolor y Paliativa	Instituto Nacional de Ciencias Médicas y Nutrición Salvador Zubrián Universidad Nacional Autónoma de México	As a returning invited faculty member, I teach palliative care-focused topics in English and Spanish to the pain and oncology faculty, trainees, and community clinicians at one of Mexico's few national palliative care training programs.
2021 -	American Society of Clinical Oncology	International Educator for India and Indonesia	I am an active member of the ASCO International Education Committee. I also serve as a faculty educator for ongoing virtual courses focused on resource-limited settings and patients with the highest needs. I have facilitated discussions on palliative care topics, including optimal symptom management, communication, prognostication, and end-of-life care.
2022 -	Co-mentor PI Tibbitts Investigating sex and gender-related differences in immunotherapy treatment effects (NCT06562777)	Building Interdisciplinary Research Careers in Women's Health (BIRCWH) NIH/NIAMS 8K12AR084221	I serve as a co-mentor and research collaborator on Dr. Tibbitts's career development award, a prospective observational study comparing the incidence and severity of immunotherapy-related adverse events (irAEs) between self-identified sex/gender.

VI. SCHOLARSHIP

Area of Research Interest/Scholarly Interest

Symptom Science and Clinical Intervention: My clinical research interest and expertise focus on optimizing symptom management for people living with cancer. My significant scholarly activities and achievements center on identifying, validating, and expanding the number of pharmacologic interventions to minimize treatment-related toxicity and optimize quality of life. My research interests include cancer cachexia, immunotherapy-related adverse events (irAEs), chemotherapy-induced peripheral neuropathy (CIPN), and chemotherapy-induced nausea and vomiting (CINV).

Keywords: symptom science, oncology, drug development, palliative care, cancer cachexia, nausea/vomiting, neuropathy

Grants and Contracts

Total current grants awarded as Principal Investigator (PI) or Co-Principal Investigator (Co-PI)					
Federal	8	Total as PI/Co-PI	4	Total dollar award	\$6,190,228
State and Local	21	Total as PI/Co-PI	21	Total dollar award	~\$1,500,000

Federal

Current

- 2020 - 2025 PATTERN: Patterns and predictors of symptoms, falls, and functioning across treatment and recovery in patients treated with neurotoxic chemotherapy for cancer
 Sponsor: NIH/NCI (NCT05790538)
 Division of Cancer Prevention 1R01CA226082-01A1
 Co-I (PI: Winters-Stone; 0.6 person months per year, \$3,139,032)
 This study aims to characterize the trajectories of neuropathy symptoms and functioning (objective mobility, physical activity, self-reported functioning, and disability) after receipt of neurotoxic chemotherapy. Additionally, we will determine the simplest patient-centered predictors of symptom and functional trajectories to identify patients who would benefit most from early, targeted interventions. The knowledge gained from this study will identify high-risk patients who may benefit from neurotoxic chemotherapy adjustments and early targeted rehabilitation. We published the protocol in *BMC Cancer* in 2023 (PMID: [37946117](#)).

- 2023 - 2028 The Pacific Aging and Cancer Studies (PACS): An Infrastructure Advancing the Use of Digital Biomarkers and Related Technologies for Research on Functional Aging and Survivorship in Cancer
 Sponsor: NIH/NCI
 P30 Supplement CA069533-22S6
 Co-I (PI: Winters-Stone; \$2,731,196)
 This project aims to assess the feasibility of implementing a continuous, passive monitoring platform to describe changes in digital biomarkers of toxicity and symptom trajectories (mobility, cognitive function, sleep, pain, depression) between older and younger patients receiving cancer treatment. We published our findings in patients with hematologic malignancy undergoing autologous hematopoietic stem cell transplantation in *JMIR Cancer* in 2022 (PMID: [36480243](#)).

Completed

- 2022 - 2024 SWOG S2013: Immune Checkpoint Inhibitor Toxicity (I-CHECKIT): A Prospective Observational Study Sponsor: NCI/NCTN (NCT04871542)
 Site PI (PI: Gunturu; per patient \$3,000)
 This SWOG-sponsored NCTN study focuses on developing and validating a risk prediction model for grade 3 or high non-hematological immune-related adverse events (irAEs) in the first year of immune checkpoint inhibitor-based therapy for treating solid tumors. Additionally, a translational aim is to develop a cytokine toxicity score derived from 11 cytokine levels as a predictive signature for the development of irAEs.

- 2015 Alliance A221301: Olanzapine for the Prevention of Chemotherapy-Induced Nausea and Vomiting in Patients Receiving Highly Emetogenic Chemotherapy (HEC): A Randomized, Double-Blind, Placebo-Controlled Trial
Sponsor: NCI/NCTN (NCT02116530)
Site PI (PI: Navari; per patient \$2,500)
Olanzapine is a second-generation antipsychotic with dopamine and serotonin (D2, 5HT2A, 5HT2C, and 5HT3) neurotransmitter activity, including receptors in the nausea/vomiting pathway. This study evaluated the combination of olanzapine vs placebo with standard chemotherapy-induced nausea and vomiting (CINV) prophylaxis in patients receiving highly emetogenic chemotherapy. Results demonstrated that adding olanzapine improved CINV complete response without severe side effects (*New England Journal of Medicine*, 2016). Olanzapine is now part of all evidence-based guidelines for CINV prophylaxis.
- 2015 SWOG S1013: Prospective Study of Epidermal Growth Factor Receptor (HER-1/EGFR) Inhibitor-Induced Dermatologic Toxicity: Validation of the Functional Assessment of Cancer-Therapy-EGFRI 18 (FACT-EGFRI 18) Questionnaire for EGFR-Induced Skin Toxicities
Sponsor: NCI/NCTN (NCT01416688)
Site PI (PI: Baker; per patient \$1,000)
This study validated a questionnaire to assess therapy complications, including psychosocial and quality-of-life assessment in patients receiving epithelial growth factor receptor-targeted therapy with skin toxicity (*Journal of Patient-Reported Outcomes* 2020).
- 2015 - 2016 A Prospective Pilot Study to Evaluate and Correlate Early Lean Muscle Loss with Functional Activity in Metastatic Gastrointestinal and Lung Cancer Patients
Sponsor: NCI/NCTN
Alliance Cancer Control Program Junior Faculty Award #UG1CA189823
PI (\$200,000)
This grant supported a prospective, observational study correlating body composition changes per cross-sectional computed tomography (CT) with anthropometric, functional, and patient-reported outcomes (*Supportive Care in Cancer* 2021, PMID: [32990784](#), first author).
- 2015 - 2018 Alliance AA221203: Early Palliative Care in Metastatic Gastrointestinal and Lung Cancer Patients
Sponsor: NCI/NCTN (NCT01401907)
Site PI (PI: Temel; per patient \$2,500)
Following the groundbreaking palliative care study published in the *New England Journal of Medicine* in 2010, the Alliance proposed a multicenter study evaluating the integration of palliative care within 8 weeks of a metastatic gastrointestinal or incurable lung cancer diagnosis. The University of California San Diego was selected as one of 10 academic sites, and we enrolled 25 patients in the study. Overall, this study demonstrated improved quality of life but had high degrees of missing data, highlighting the challenges of enrolling patients in supportive care trials through an NCTN mechanism (*Journal of Palliative Medicine* 2020, PMID: [32031887](#)).
- 2017 - 2018 Cancer Clinical Investigator Team Leadership Award
Sponsor: NCI
PI (\$120,000)
This grant recognizes and supports outstanding mid-career clinical investigators at NCI-designated cancer centers who improve the lives of people living with cancer through extensive involvement in NCI-funded collaborative clinical trials and whose leadership, participation, and activities promote clinical trials and research. The award provided 15% effort to continue active engagement in symptom interventional clinical trials. Cancer Center Directors nominate each

recipient based on their qualifications, interests, accomplishments, and the nominee's ability to pursue an academic career in clinical research.

National Foundations

2025 - Taking Aim at the Achilles' Heel: Leveraging the Study of Off-Target Immune Toxicities to Improve the Treatment of Patients on Immune Checkpoint Inhibitor Therapy for Cancer.

Sponsor: Kuni Foundation

Co-I (Co-PIs: Molly Thomas, MD, PhD, and Deanne Tibbitts; \$100,000)

The blockade of immune checkpoints (PD-1 and CTLA-4) has advanced oncology but is hindered by immune-related adverse events (irAEs), particularly colitis (irColitis). This project hypothesizes that baseline patient factors and CD8+ T cell states can predict irColitis risk. Objectives include: (1) Defining a retrospective irColitis cohort using large language models to identify risk factors; (2) Investigating CD8 T_{RM} cell signatures in tissue as predictors; and (3) Establishing a prospective cohort to assess blood CD8 T cell features related to irColitis risk.

Completed

2012 - 2014 Single-Center, Prospective Feasibility Study Evaluating a Novel Approach to Advance Care Planning in an Outpatient Academic Palliative Care Clinic

American Cancer Society

University of California San Diego Pilot Grant

Principal Investigator (\$30,000)

This study evaluated a novel, practical social worker-led advance care planning intervention, assessing the concordance between end-of-life care wishes and actual events. This pilot study (n=34) suggests a focused intervention was feasible and may be sufficient to inform a proxy and achieve end-of-life preferences (*Journal of Palliative Medicine* 2016, PMID: [26826962](#), Last Author).

2013 - 2018 Positive Outcomes in Cancer Care: Emphasizing Quality of Life and Legacy

American Cancer Society

124667-MRSG-13-233-01-PCSM

Co-Investigator (PI: Montross; \$714,000)

Dignity therapy is a psychotherapeutic intervention that helps patients with terminal illnesses review the people and events most meaningful to them and document their legacy to improve the end-of-life experience. I was a Co-I and site PI for this grant, assisting with patient identification and recruitment in our academic palliative care clinic. We successfully referred and enrolled over 50 patients in this study, published in *BMC Palliative Care* [PMID: [26391775](#)].

2016 - 2019 Sojourns Scholar Leadership Program

Cambia Health Foundation

Principal Investigator (\$180,000)

This grant's focus is to identify, cultivate, and advance the next generation of palliative care leaders. This program includes multidisciplinary palliative care clinicians and other emerging health system leaders by investing in their professional development. As a Sojourns Scholar, I received funding over two years to protect time for critical leadership skill development and to conduct a prospective observational study of patients with metastatic cancer experiencing weight loss. The project aimed to refine cancer cachexia clinical trial methodology, which we published in *Supportive Care in Cancer* (2021) [PMID: [32990784](#), first author].

2018 - 2020 Key Outcomes in Palliative Care Chaplaincy
 Sponsor: Cambia Health Foundation
 Co-I, Co-mentor (PI: Kestenbaum, \$180,000)
 I mentored a palliative care chaplain in developing a longitudinal database of patient-centered chaplaincy outcomes in palliative care at an academic palliative care clinic. This dataset was used to obtain funding from the Cambia Health Foundation. Allison Kestenbaum, BCC-PCHAC, ACPE, was named the first chaplain recipient of the Sojourns Scholar Leader Award, and we published early findings in the *Journal of Health Care Chaplaincy* [PMID: [34866556](#), Last Author].

State and Local: Industry

Current

2023 - 2025 Study of the Efficacy and Safety of Ponegromab in Patients with Cancer, Cachexia, and Elevated GDF-15 (PROACC-1)
 Sponsor: Pfizer ([NCT05546476](#))
 Executive Steering Committee Member / Site PI (Start-up \$20,000, per patient \$55,991)
 This phase II RCT evaluated the efficacy, safety, and tolerability of ponegromab, an inhibitor of GDF-15, compared to placebo in patients with cancer, cachexia, and elevated growth differentiation factor -15 (GDF-15). Patients with advanced cancer and elevated concentrations of GDF-15 frequently develop cachexia, which impacts their quality of life and survival. Inhibiting the activity of GDF-15 in such patients may help reverse cachexia and improve their quality of life. We were the highest-enrolling site in North America, and the results were presented at the European Society of Medical Oncology in September 2024, with simultaneous publication in the *New England Journal of Medicine* (PMID: [39282907](#)).

2025 - A Low-Interventional Study to Assess GDF-15 Levels in Adult Participants with Cachexia and Malignant Solid Tumors
 Sponsor: Pfizer
 Executive Steering Committee Member / Site PI (Start-up \$10,000, per patient \$1,749)
 This low-interventional study aims to measure growth differentiation factor-15 (GDF-15) levels in adults with cachexia and malignant solid tumors in a real-world setting. By enrolling patients across institutions, the study seeks to characterize GDF-15 in individuals with malignant solid tumors, excluding non-small cell lung cancer, pancreatic cancer, and colorectal cancer. The findings may inform the management of patients living with cancer and elevated GDF-15 levels, potentially leading to a significant global impact.

2025 - A Phase 1B Dose-Escalation Study of AV-380 in Combination with Standard-of-Care Chemotherapy in Metastatic Cancer Patients with Cachexia and Elevated GDF-15 Levels
 Sponsor: Aveo Pharmaceuticals ([NCT05865535](#))
 National PI / Site PI (Start-up \$pending, per patient \$pending)
 This open-label ascending dose study aims to assess the safety, pharmacokinetics, pharmacodynamics, and immunogenicity of AV-380 in patients with metastatic solid tumor cancers experiencing cachexia. AV-380 is an intravenous IgG1 monoclonal antibody designed to bind to circulating human growth differentiation factor 15 (GDF-15), a cytokine implicated in cancer-related cachexia.

Completed

- 2012 - 2013 Randomized Phase II Placebo-Controlled Study of LY2495655 in Patients with Advanced or Metastatic Pancreatic Cancer Receiving Chemotherapy
 Sponsor: Eli Lilly (NCT01505530)
 Site PI (Start-up \$17,024; per patient \$19,087)
 Anti-myostatin antibodies have shown activity in preclinical models of skeletal muscle wasting, including cancer cachexia. LY2495655 is a humanized monoclonal antibody to myostatin, a key regulator of skeletal muscle development. This trial failed to accrue patients due to restrictive inclusion criteria requiring >5% weight loss over the preceding 6 months. Data did not demonstrate any benefit in patients with pancreatic cancer. My experiences with this study made me question existing prospective clinical methods for evaluating novel pharmacologic approaches in treating patients with cancer cachexia (*Journal Cachexia Sarcopenia Muscle* 2018).
- 2012 - 2015 Phase I Safety Study of LY2787106 in Patients with Cancer and Anemia
 Sponsor: Eli Lilly (NCT01340976)
 Site PI (Start-up \$11,020; per patient \$20,319)
 Heparin plays a central role in iron homeostasis and erythropoiesis. Neutralizing hepcidin with a monoclonal antibody may prevent ferroportin internalization, restore cell iron efflux, and allow transferrin-mediated iron transport to the bone marrow. This multicenter phase I study evaluated the safety, pharmacokinetics, pharmacodynamics, and efficacy of a fully humanized monoclonal antibody (LY2787106) targeting hepcidin in patients with cancer and anemia. We enrolled 36% (12 of 33) total patients, presented our findings at the American Society of Hematology 2015 Annual Meeting, and published in the *Journal of Hematology and Oncology* in 2017 (PMID: [28327200](#), Senior Author).
- 2012 - 2017 Phase III Randomized, Placebo-Controlled Clinical Trial to Study the Safety and Efficacy of V212 in Adult Patients with Solid Tumor or Hematologic Malignancy
 Sponsor: Merck (NCT01254630)
 Site PI (Start-up \$14,720; per patient \$9,086)
 Herpes zoster is a common and extremely painful event for patients with cancer. Previous FDA-approved vaccines were contraindicated in patients receiving chemotherapy. This large international study (n=5,286) evaluated a third-generation, gamma-irradiated herpes zoster vaccine for patients with cancer receiving chemotherapy. Results demonstrated that the inactivated varicella-zoster virus (VZV) vaccine was well tolerated and efficacious in preventing VZV in patients with solid tumor cancers receiving chemotherapy [PMID: [31399378](#)].
- 2013 Anamorelin HCl in the Treatment of Non-Small Cell Lung Cancer Cachexia (NSCLC-C): A Randomized, Double-Blind, Placebo-Controlled, Multicenter, Phase III Study to Evaluate the Safety and Efficacy of Anamorelin HCl in Patients with NSCLC-C (ROMANA 1)
 Sponsor: Helsinn Healthcare SA (NCT01387269)
 Site PI (Start-up \$13,670; per patient \$11,395)
 Preclinical and early-phase clinical trials demonstrated improved lean body mass in patients with cancer cachexia receiving anamorelin, an oral ghrelin analog. This international RCT demonstrated that anamorelin significantly increased lean body mass but did not improve handgrip strength (*Lancet Oncology* 2016). My experiences with this trial catalyzed my interest in evaluating and validating prospective methodologies for cancer cachexia clinical trials to inform clinically meaningful endpoints for regulatory approval.
- 2013 Anamorelin HCl in the Treatment of Non-Small Cell Lung Cancer Cachexia: An Extension Study (ROMANA 3)
 Sponsor: Helsinn Healthcare SA (NCT01395914)
 Site PI (Start-up \$19,920; per patient \$6,676)

This study was an extension study of two phase II, double-blind studies to assess the safety and efficacy of anamorelin in patients with advanced non-small cell lung cancer (NSCLC)-associated cachexia. Treatment-related adverse events were similar in the treatment arm compared to the placebo without any change in regulatory approval (*Annals of Oncology* 2017).

- 2013 - 2016 Pivotal Phase III Study to Evaluate Overall Survival Using MABp1 as a Monotherapy in Metastatic Colorectal Cancer Patients with Cachexia
Sponsor: Xbiotech (NCT01767857)
Site PI (Start-up \$18,820; per patient \$11,825)
Interleukin-1 is a central mediator in cancer cachexia. A phase I study of MABp1, a fully humanized monoclonal antibody to interleukin-1 alpha, showed a promising signal in metastatic colorectal cancer. Yet, accrual to this study was limited by the requirement of >5% weight loss in the preceding 6 months (*Lancet Oncology* 2017). Again, this study fueled my desire to refine prospective methodology in evaluating novel compounds to treat cancer cachexia.
- 2013 - 2016 A Double-Blind Randomized Three-Armed Phase II Trial of Pledox in Two Different Doses in Combination with FOLFOX6 Compared to Placebo + FOLFOX6 in Patients with Advanced Metastatic Colorectal (Stage IV) Cancer (PLIANT Study)
Sponsor: Pled Pharma (NCT01619423)
Site PI (Start-up \$18,670; per patient \$20,905)
This international phase II study evaluated calmagafodipir (a superoxide dismutase mimetic and iron chelator) to prevent chemotherapy-related neutropenia and oxaliplatin-induced peripheral neuropathy. The phase II results were promising but lacked phase III data (*Acta Oncology* 2018).
- 2015 - 2017 Observational Study of Chemotherapy-Induced Nausea and Vomiting (CINV) in Patients Receiving Multiday Highly Emetogenic Chemotherapy (HEC) Regimens for Hematological Malignancies
Sponsor: Vector Oncology
Site PI (Start-up \$7,000; per patient \$1,500)
Evidence-based prophylaxis to prevent CINV in hematologic malignancy patients who receive multiday chemotherapy is lacking. This observational study aimed to collect information regarding clinician antiemetic prescribing patterns and patients' daily CINV experience.
- 2016 - 2017 Phase II, Randomized, Single-Center, Pilot Feasibility Study to Evaluate Naloxegol for Opioid-Induced Constipation in Cancer Patients
Sponsor: AstraZeneca (IND 160121, NCT02745353)
Principal Investigator (Start-up \$27,106; per patient \$3,320)
Opioid-induced constipation (OIC) is a common and distressing symptom for patients with cancer requiring burdensome self-titration of laxatives for prophylaxis and treatment. This proposed trial assessed the use of naloxegol in cancer-related OIC, utilizing an open-label crossover study compared to stimulant laxatives. Naloxegol, a peripherally selective opioid antagonist (PAMORA), was evaluated and approved in the non-cancer setting, but a randomized controlled trial in cancer failed to accrue. The primary aim of feasibility was not achieved.
- 2017 - 2018 Fixed-Dose Combination of Netupitant and Palonosetron (Akynzeo) in the Treatment of Refractory Chemotherapy-Induced Nausea and Vomiting
Sponsor: Helsinn Healthcare SA (IND 161691, NCT03008213)
PI (Start-up \$27,404; per patient \$3,575)
The primary aim of this phase II, open-label study was to determine the feasibility of using a fixed-dose combination of netupitant and palonosetron (Akynzeo) for the treatment of refractory CINV that occurs during subsequent chemotherapy cycles when prophylactic and rescue antiemetics are ineffective. The trial was closed early due to my departure from UC San Diego.

- 2017 - 2018 Phase II, Open-Label Study to Evaluate Lazanda in Cancer Patients Receiving Palliative Radiation Vomiting
Sponsor: Depomed (IND 161263, NCT03071744)
PI (Start-up \$11,574; per patient \$3,467)
In this phase II open-label study, we evaluated intranasal fentanyl as a premedication for patients receiving hypofractionated radiation for painful bony metastases. We enrolled 6 patients with improved tolerance to radiation treatments and decreased pain. The trial was terminated early due to my departure from UC San Diego.
- 2021 - 2022 A 6-Week, Randomized, Double-Blind, Sponsor-Open Study to Assess the Effect of Repeated Subcutaneous Administration of PF-06946860 on Appetite in Participants with Advanced Cancer and Anorexia, Followed by an 18-week Open-Label Treatment Period (C3651010).
Sponsor: Pfizer (NCT04803305)
Site PI (Start-up \$28,834, per patient \$32,008)
In this phase Ib study, the effects of PF-06946860 versus placebo were evaluated on cancer-associated anorexia and weight loss across various solid tumor cancers. This study's primary aim was to assess the effects of repeated subcutaneous administration of PF-06946860—a recombinant humanized monoclonal antibody directed against the cytokine growth differentiation factor 15 (GDF-15)—on appetite in people with advanced cancer, anorexia, and elevated circulating GDF-15 levels (*Clinical Cancer Research* 2024). I presented this study at the European Society of Medical Oncology 2021; later, we participated in the phase II RCT.
- 2022 - 2024 ONTARGET: A Phase 3 multicenter, Randomized, Double-Blind, Placebo-Controlled Trial Evaluating Crofelemer for the Prophylaxis of Diarrhea in Adult Patients with Solid Tumors Receiving Targeted Cancer Therapies with or without Standard Chemotherapy (NP303-102).
Sponsor: Napo Pharmaceuticals (NCT04538625)
Executive Steer Committee, Co-I, Site PI (PI: Okhuysen; Start-up \$32,316, per patient \$16,713)
This phase III study compared crofelemer with placebo to prevent diarrhea caused by tyrosine kinase inhibitors (TKIs) across various cancers, focusing on over 20 FDA-approved TKIs that cause diarrhea in more than 50% of patients. Crofelemer is an FDA-approved antidiarrheal that modulates chloride-ion activity in the intestine and has established safety with no drug interactions. The study enrolled 15 participants from the OHSU Knight Cancer Institute in July 2023. Although the primary aim was not met, a prespecified analysis found that patients with breast and lung cancer benefited from crofelemer over placebo, with results presented at the San Antonio Breast Cancer Symposium 2024.
- 2022 - 2024 A Double-Blind, Placebo-Controlled, Randomized, Dose-Escalating, Multicenter, Phase I Study to Assess the Safety and Tolerability of ART-123 in Combination with Leucovorin/5-Fluorouracil/Oxaliplatin and Bevacizumab in Metastatic Colorectal Cancer Patients (ART-123.PN101)
Sponsor: Veloxis Pharmaceuticals (NCT05251727)
US National Lead PI / Site PI (Start-up \$35,864, per patient \$13,042)
This phase I study assessed the safety and tolerability of ART-123 combined with first-line FOLFOX and bevacizumab in patients with metastatic colorectal cancer, including those with resected and intact primary tumors. ART-123, a recombinant human soluble thrombomodulin approved in Japan for sepsis, may help prevent oxaliplatin-induced peripheral neuropathy by activating thrombin activatable fibrinolysis inhibitor (TAFI) and protein C, and inactivating high-mobility group box 1 protein (HMGB1). A prior phase II study in 80 patients showed ART-123's potential in delaying and reducing OIPN during adjuvant FOLFOX, necessitating further validation in the metastatic setting.

- 2022 - 2025 Study of the Efficacy and Safety of Ponegromab in Patients with Cancer, Cachexia, and Elevated GDF-15 (PROACC-1).
 Sponsor: Pfizer (NCT05546476)
 Site PI (Start-up \$28,834, per patient \$32,008)
 This phase II study evaluated 3 doses of ponegromab (a monoclonal antibody targeting growth differentiation factor 15 [GDF-15]) versus placebo in patients with lung, pancreatic, or colorectal cancer with elevated GDF-15 levels and ongoing weight loss. This study's primary aim was to assess the effects of ponegromab on weight loss. Secondary endpoints included appetite and cachexia symptoms; exploratory endpoints included skeletal muscle, digital measures of physical activity, and safety. Patients receiving the highest dose of ponegromab (400mg SC monthly) experienced an average 6.2-pound weight gain over 12 weeks with improved appetite, cachexia symptoms, skeletal muscle, and physical activity with demonstrated safety. This study was presented at the European Society of Medical Oncology 2024 and simultaneously published in the *New England Journal of Medicine* (PMID: [39282907](#)).

State and Local: Grants

Current

- 2023 - INSITE: Investigating Sex and Gender-related Differences in Immunotherapy Treatment Effects
 Sponsor: NIH/NIAMS (NCT06562777)
 Building Interdisciplinary Research Careers in Women's Health (BIRCI) #8K12AR084221
 Co-I, Co-mentor (PI: Tibbitts; \$243,876)
 I serve as a collaborator and research mentor on Dr. Tibbitts's career development award, a prospective observational study comparing the incidence and severity of immunotherapy-related adverse events (irAEs) between self-identified men and women. Currently, 55 of 90 participants have enrolled.
- 2024 - ACTO: A Phase II, Pilot Randomized Trial of Olanzapine in the Treatment of Cancer Cachexia
 Sponsor: NIH/NCI (NCT05705492)
 NCI-2022-10209 Cancer Support Grants #P30CA069533
 PI (\$50,000)
 This ongoing randomized, placebo-controlled phase II study evaluates the impact of olanzapine vs placebo on anorexia, weight gain, and quality of life in patients with advanced cancer. Interdisciplinary and intra-programmatic collaborators include Kerri Winters-Stone, PhD, and Teresa Zimmers, PhD. It is sponsored by the NCI and Knight Cancer Institute Philanthropic funds.

Completed

- 2013 - 2016 Single-center, Prospective Expansion Study Evaluating Advance Care Planning Discussions Utilizing a Novel Approach as Performed by a Palliative Care Pharmacist
 Sponsor: In-kind
 PI
 Building upon our previous social-worker-led intervention, I supervised a palliative care pharmacist (Co-I Joseph Ma, PharmD) in a single institution study to evaluate his expanded role as a facilitator of advance care planning, including concordance of end-of-life care wishes and actual events. We published our experience with this pharmacist-led intervention in the *Journal of Oncology Practice* (2021) [PMID: [33417492](#), Last Author].
- 2014 - 2015 Prospective Pilot Study to Evaluate Early Skeletal Muscle Loss and Correlation with Functional Activity in Cancer Patients Using Actigraphy

Sponsor: University of California San Diego Academic Senate Research Bridge Grant
PI (\$10,000)

With this institutional grant, I collected preliminary feasibility information regarding the use of actigraphy in patients with incurable cancer and cachexia. Despite the research team's engagement and support, participants did not adhere to the wear requirements due to practical challenges and perceived burden. I learned the importance of including a physical function and activity expert when using actigraphy in clinical trials to address the practical challenges of collecting these data.

2016 - 2018 FIT: Functional and Imaging Testing to Evaluate Body Composition and Functional Activity in Metastatic Cancer Patients

Sponsor: University of California San Diego Clinical Translational Research Institute
Career Development Award #KL2TR001444 L30 CA199550
PI (\$300,000)

This grant supported my career development by enabling me to complete a prospective observational study of patients with advanced cancer receiving chemotherapy. The study aimed to correlate changes in body composition on cross-sectional CT scans with anthropometric, functional, and patient-reported outcomes (PROs). We did not observe any association between weight changes and functional outcomes or PROs. Yet, greater skeletal muscle loss was associated with a greater decline in physical function [PMID: [32990784](#), first author].

National

05/13	Speaker	Managing Acute-on-Chronic Pain in the Hospitalized Patient	Society of Hospital Medicine Annual Meeting Washington DC
03/14	Speaker	I Feel Your Pain: Managing Acute Pain in the Chronic Pain Patient	Society of Hospital Medicine Annual Meeting Las Vegas, NV
02/15	Speaker	Polypharmacy Police vs. Patient Advocate: An Evidence-Based, Patient-Tailored Approach to Medication Simplification Strategies for Palliative Care	American Academy of Hospice and Palliative Medicine Annual Meeting Philadelphia, PA
09/15	Speaker	Cancer Cachexia and Assessing Quality of Life	Global Palliative Care Quality Alliance Webinar
09/15	Speaker	Current and Emerging Therapies for the Treatment of Cancer Cachexia	American College of Clinical Pharmacy Annual Meeting San Francisco, CA
12/15	Speaker	Spanning the Canyon Between Stem Cell Transplantation and Palliative Care	American Society of Hematology Annual Meeting Education Program Orlando, FL
03/16	Speaker	The Good, The Bad, and The Ugly: Pain Management for the Hospitalist	Society of Hospital Medicine Annual Meeting San Diego, CA

05/16	Plenary Speaker	Optimizing Quality of Life in Patients with Advanced Cancer	American Urology Association Annual Meeting San Diego, CA
06/16	Discussant	Breaking Bad Symptoms	American Society of Clinical Oncology Annual Meeting Patient and Survivor Care Track Chicago, IL
09/16	Speaker	Palliative Care in Marrow and Stem Cell Transplant	Association of Veterans Administration Hematology/Oncology (AVAHO) Dallas, TX
11/16	Speaker	Palliative Care in Stem Cell Transplantation	Kaiser Permanente Hematology/Oncology Portland, OR
03/17	Speaker	Patient-Reported Outcomes: Clinical and Practical Considerations	Pfizer Inc La Jolla, CA
08/17	Speaker	Olanzapine in the Treatment of Chronic Nausea	University of Alabama at Birmingham Division of Gerontology, Geriatrics, and Palliative Care Grand Rounds Birmingham, AL
10/17	Speaker	Integrating Hematologic Malignancies and Palliative Care: Ready for Primetime?	Global Palliative Care Quality Alliance Webinar
10/17	Session Chair	Symptom Management	American Society of Clinical Oncology Palliative and Supportive Care Symposium San Diego, CA
10/17	Speaker	Prognostication in the Immunotherapy Era	American Society of Clinical Oncology Palliative and Supportive Care Symposium San Diego, CA
11/17	Speaker	Integration of Palliative Care into the Care of Stem Cell Transplant Patients	National Marrow Donor Program Council Meeting Minneapolis, MN
12/17	Panelist, Discussant, and Speaker	Multidisciplinary Approach to Diarrhea Prevention and Management in the Cancer Patient	Food and Drug Administration Bethesda, MD
02/18	Panelist	1. Managing Stress, Anxiety, and Depression in My Patients 2. The Role of Palliative Care in Improving Health-Related Quality of Life	United States Cutaneous Lymphoma Consortium San Diego, CA
03/18	Speaker	Healthy Volunteers in Phase I Oncology Clinical Trials: Through the Patient Lens	American Society of Bone Marrow Transplant Annual Meeting Orlando, FL

07/18	Speaker	Patient and Survivor Care	American Society of Clinical Oncology Best of ASCO Annual Meeting San Diego, CA
11/18	Speaker	Palliative Care: How to Make the Best of the Worst	4 th Annual West Cancer Center Oncology Conference Memphis, TN
11/18	Chair	The Great Opioid Debate	American Society of Clinical Oncology Palliative and Supportive Care Symposium San Diego, CA
11/18	Speaker	Opioid Challenges for Cancer Patients in Today's Push for Reduction	Sharp Healthcare Possibilities, Probabilities, and Prediction: Practical Strategies to Use for Supportive and Palliative Care in Oncology San Diego, CA
05/19	Chair	Seeking Balance in Opioid Prescribing	American Society of Clinical Oncology Annual Meeting Chicago, IL
10/19	Chair	Keynote Lecture	American Society of Clinical Oncology Supportive Care Symposium San Francisco, CA
10/19	Panel Discussant	Optimal Use of Corticosteroids in Palliative Oncology	American Society of Clinical Oncology Supportive Care Symposium San Francisco, CA
05/20	Discussant	Breaking Bad: Evaluating Efficacy of Old and New Drugs on Symptom Management	American Society of Clinical Oncology Annual Meeting Virtual presentation in the COVID-19 Era
09/20	Speaker	The "Skinny" on Cancer Cachexia	Grand Rounds Indiana University Melvin & Bren Simon Comprehensive Cancer Center Virtual presentation during the COVID-19 pandemic
11/20	Speaker	Clinical Trial in Cancer Cachexia – Knowing the Past to Shape the Future	Cancer Cachexia Society Seminar Series Virtual presentation during the COVID-19 pandemic
04/20	Speaker and Panel Discussant	Cancer Cachexia Mini-Symposium	Food and Drug Administration Virtual presentation during the COVID-19 pandemic
08/20	Panel Discussant	Conversations with Patients and Caregivers	6 th Cancer Cachexia Conference Virtual presentation during the COVID-19 pandemic
04/23	Speaker	Cachexia, Sarcopenia, and Frailty: Different Perspectives of a Similar Challenge?	University of Oklahoma Health Sciences Center 2023 Nathan Shock Center Geroscience Symposium The Intersection of Sarcopenia in Aging and Cancer Cachexia Oklahoma City, OK
06/24	Chair	Multidisciplinary Approach to Navigating Early-Stage Rectal Cancer	American Society of Clinical Oncology Annual Meeting Case-Based Panel Discussion Chicago, IL

07/24	Speaker	Symptom Science and Palliative Care	American Society of Clinical Oncology Best of ASCO Boston, MA
09/24	Discussant	Oral Abstract Session A	American Society of Clinical Oncology Quality Care Symposium San Francisco, CA
10/24	Speaker	ASCO Cannabis Guideline: Summarizing the Evidence to Inform Policy, Practice, and Next Steps	Memorial Sloan Kettering Cancer Center Department of Epidemiology and Biostatistics Health Outcomes Research Group New York, NY
11/24	Speaker	Mentorship at the Intersection of Medical Oncology and Palliative Care	American Society of Clinical Oncology Palliative Care Community of Practice Virtual interactive presentation
12/24	Speaker	What is the Standard of Care for Patients with Cancer Cachexia?	Sarcopenia Cachexia Wasting Disorders Annual Conference Regulatory Workshop Washington, DC
04/25	Speaker	Cancer Cachexia: from Preclinical Models to Bedside Interventions	National Cancer Institute Division of Cancer Prevention Building Bridges Symptom Science Webinar
05/25	Chair	"What About Cannabis?": Incorporating Evidence to Facilitate Informed Discussions with Patients and Caregivers	American Society of Clinical Oncology Annual Meeting Case-Based Discussion Chicago, IL
05/25	Speaker	Future Educational Content at ASCO – Developing Themes & Objectives	American Society of Clinical Oncology Inaugural ASPIRE Community of Practice Meeting Chicago, IL
05/25	Speaker	Mentorship at the Intersection of Oncology and Palliative Care	American Society of Clinical Oncology Palliative Care Community of Practice Meeting Chicago, IL
06/25	Discussant	ASCO 2025 Abstract Discussant Phase III randomized placebo-controlled trial on repurposing olanzapine for prevention of radiation-induced nausea and vomiting: CTRI/2022/01/039723	American Cancer Society / Center to Advance Palliative Care Strengthening Palliative Care in Oncology Virtual Webinar
06/25	Speaker	Workshop: Partnering with patients in managing chronic toxicities of cancer and its treatment Long-term side effects of existing and emerging modalities	Multinational Association for Supportive Care in Cancer Annual Meeting Seattle, WA
06/25	Chair	Plenary: Emerging toxicities of emerging treatments	Multinational Association for Supportive Care in Cancer Annual Meeting Seattle, WA

06/25	Speaker	Psychedelics and cannabis anyone? Opportunities and challenges of drug repurposing in the management of emerging psychosocial challenges Cannabis and cannabinoids in supportive care for cancer	Multinational Association for Supportive Care in Cancer Annual Meeting Seattle, WA
01/26	Speaker	The hidden burden: why cachexia matters	American Society of Clinical Oncology Gastrointestinal Cancers Symposium Collaborative Oncology Alliance for Cachexia Education (COACH-ED) CME Program San Francisco, CA

Regional

12/08	Speaker	Darkness No More "Light Up a Life" Annual Fundraiser	San Diego Hospice and the Institute for Palliative Medicine San Diego, CA
04/12	Speaker	Initiating a Palliative Care Program at an Academic Tertiary Care Center	University of California Los Angeles Los Angeles, CA
09/14	Speaker	Redefining the Role of Paternalism in Palliative Medicine Grand Rounds	City of Hope Grand Rounds Duarte, CA
07/15	Speaker	Cancer Symptom Management and Clinical Research	San Diego Professional Oncology Network San Diego, CA
11/24	Speaker	Cannabis and Cannabinoids in the Care of People Living with Cancer: Applying the Evidence to Clinic, Policy, and Advocacy	Oregon Health and Science University All City Palliative Care Lecture Series Portland, OR
11/24	Speaker	Immune Checkpoint Inhibitors: Essential Insights for the Practicing Internist	American College of Physicians Oregon Chapter Annual Meeting Portland, OR
11/24	Speaker	Ponsegromab for the Treatment of Cancer Cachexia	Portland's Medical Oncology Journal Club Portland, OR
11/24	Discussant	Ponsegromab for the Treatment of Cancer Cachexia	University of California San Diego Moores Cancer Center Hematology-Oncology Fellowship Series Virtual presentation with Dr. Karen Resnick

Local/Institutional

11/14	Speaker	Pulmonary and Critical Care Grand Rounds	University of California San Diego La Jolla, CA
-------	---------	--	--

09/15	Speaker	Optimal Symptom Management	Pseudomyxoma Peritonei Cancer Symposium La Jolla, CA
09/16	Speaker	1. Palliative Care: Optimal Symptom Management to Advance Care Planning 2. Palliative vs. Hospice Care	San Diego State University / University of California San Diego U54 Partnership Annual Retreat La Jolla, CA
08/21	Speaker	Cancer Cachexia: Clinical Trial Considerations	Oregon Health and Science University Pediatric and Adult Palliative Care Grand Rounds Portland, OR
04/22	Speaker	What the Heck is Symptom Science?	Oregon Health and Science University Knight Cancer Center Clinical Research Management and Clinical Research Quality & Administration monthly seminar series Portland, OR
10/22	Speaker	The Role of Palliative Care in Sarcoma	Oregon Health and Science University Knight Cancer Institute Sarcoma Patient Education Conference 2022 Portland, OR
12/22	Panelist	Patient Resiliency: Symptom Science Q&A and Strategic Planning Discussion	Oregon Health and Science University Knight Cancer Institute Brenden-Colon Center for Pancreatic Cancer 2022 Scientific Retreat Portland, OR
04/25	Speaker	Symptom Science: Optimizing the Patient Experience in Cancer Care	Oregon Health and Science University Knight Cancer Institute Biostatistics Shared Resource Cancer Clinical Trials Methods: Training and Workshop Portland, OR
04/25	Speaker	Building Study Protocol Observations: Patient-Reported Outcomes	Oregon Health and Science University Knight Cancer Institute Investigator-Initiated Trial Incubator Portland, OR
11/25	Speaker	Branden-Colson Center for Pancreatic Care Pancreatic Cancer Thrivership Community Conference	Supportive Care & Cachexia Knight Cancer Institute Portland, OR
01/26	Speaker	26 th Annual Hematology and Breast Cancer Update	Immune Checkpoint Inhibitor Toxicities: Essential Insights for the Practicing Clinician Knight Cancer Institute Portland, OR

Honors and Awards

2009	Dickinson Foundation Palliative Medicine Fellow	San Diego Hospice and The Institute of Palliative Medicine	Endowed palliative care fellow scholar
------	--	---	---

2011	Travel Scholar	American Society of Clinical Oncology	Clinical research award to attend the annual meeting
2013	National Center of Leadership in Academic Medicine	University of California San Diego	Junior faculty leadership training program
2014	Kathleen Foley Palliative Care Research Scholars Award	American Academy of Hospice and Palliative Medicine	Research scholar award in recognition of research contribution and participation
2015	Inspirational Leader Under 40 Award	American Academy of Hospice and Palliative Medicine	Award for contribution and leadership in palliative care
2015	Fellow of the American Academy of Hospice and Palliative Medicine (FAAHPM)	American Academy of Hospice and Palliative Medicine	Distinction for members with a dedicated track record of volunteering for AAHPM
2015	Top Hospice and Palliative Medicine Physician	San Diego Journal	San Diego's Top Doctors
2017, 2018	Supportive Oncology Workshop	Massachusetts General Hospital	Selected small group co-leader alum faculty
2019, 2021	Brian A. McGovern, MD Award for Clinical Excellence Award Nominee	Massachusetts General Physicians Organization	Faculty nomination for commitment to physician skill, caring, and compassion
2020	Top Oncology Internal Medicine Educator Nominee	Massachusetts General Hospital	End-of-the-year internal medicine residency survey for faculty committed to teaching house staff
2023	Fellow of the American Society of Clinical Oncology (FASCO)	American Society of Clinical Oncology	Distinction for members with a dedicated track record of volunteering for ASCO, Conquer Cancer, and its Foundation
2024	Continuing Professional Development Clinical Star Award	Oregon Health and Science University	Recognition for exemplary patient experience scores in the top quartile of all OHSU clinicians
2024	Notable Articles of the Year	New England Journal of Medicine	<i>The NEJM Editors selected Ponsegromab for the Treatment of Cancer Cachexia as one of the year's most notable and impactful articles in 2024.</i>
2025	Outstanding Mentor Award	Oregon Health and Science University	OHSU School of Medicine Recognition for dedication, contribution, and impact supporting faculty.

Quality, Systems Improvement, and Patient Safety

2016	<p>American Society of Clinical Oncology (ASCO) Pilot Pain Survey Quality Improvement Project Site Principal Investigator (In-kind)</p> <p>Two sites were selected to participate in a quality improvement project to determine if an opioid safety questionnaire delivered in an outpatient palliative care clinic was feasible and improved communication surrounding opioids. Our participation shaped ASCO education efforts, recommendations for ASCO membership to improve opioid safety in outpatient oncology clinics, and informed patient educational materials. Results were presented at the 2017 ASCO Quality Care Symposium, and materials are now available to all ASCO members.</p>

VIII. TEACHING**Direct Teaching Activities**

<i>Year(s)</i>	<i>Role</i>	<i>Course Details</i>	<i>Level of activity</i>
2011 - 2016	Facilitator	University of California San Diego School of Medicine (SOM 231) Principals of Clinical Oncology Problem-based learning groups	4 hours per year
2012 - 2018	Educator	University of California San Diego Palliative Care Fellow Core Lecture Series Oncology Topics for the Palliative Care Clinician	4 hours per year
2012 - 2018	Educator	University of California San Diego Hematology/Oncology Fellow Core Lecture Series Palliative Care Topics for the Oncologist	2 hours per year
2014 - 2018	Discussant	University of California San Diego Skaggs School of Pharmacy SPPS 273/BIOM267/PHARM210/MGT317250 Drug Discovery, Development, and Commercialization	1 hour per year
2016	Facilitator	University of California San Diego School of Medicine Clerkship Proctored Patient Interview	10 hours per year
2019 - 2020	Educator	Massachusetts General Hospital Hematology/Oncology Fellow Core Weekly Lecture Series Symptom Management Chalk Talk	2 hours per year
2020 - 2021	Educator	Massachusetts General Hospital Internal Medicine Core Lunch Lecture Series Symptom Management Chalk Talk	2 hours per year
2021 -	Educator	Oregon Health and Science University Hematology/Oncology Fellow Core Weekly Lecture Series Symptom Management	4 hours per year
2021 -	Educator	Oregon Health and Science University Palliative Care Fellow Core Weekly Lecture Series Symptom Management	2 hours per year

Clinical Teaching Activities

2012 - 2018	Ambulatory Care Clinical Supervisor	University of California San Diego Moore's Cancer Center	Medical and pharmacy students, internal
-------------	--	---	--

		Palliative Care La Jolla, CA	medicine residents, palliative care fellows, gynecology oncology fellows, pain anesthesia fellows
2012 - 2018	Inpatient Care	University of California San Diego Medical Oncology La Jolla, CA	Medical and pharmacy students, internal medicine residents, hematology/oncology fellows
2018 - 2021	Ambulatory Care	Massachusetts General Hospital Tucker Gosnell Center for Gastrointestinal Cancers Boston, MA	Hematology/oncology fellows
2018 - 2021	Inpatient Care	Massachusetts General Hospital Medical Oncology Ellison 16 Boston, MA	Internal medicine residents
2021 -	Inpatient Care	Oregon Health and Science University Medical Oncology Consult Service Portland, OR	Hematology/oncology fellows, internal medicine residents

Curriculum Development

2012 - 2014	Co-Chair	University of California San Diego Skaggs School of Pharmacy (SPPS 269) Pharmacotherapy of Pain Management	24 hours per year
	<i>Purpose/Need:</i>	The purpose of this course was to engage learners regarding evidence-based strategies for symptom management, including a focus on clinically relevant pearls and a 3-hour clinical observation.	
	<i>Intended Audience:</i>	School of Pharmacy Students	
	<i>Duration:</i>	9 weeks of lecture, 2 hours per week, plus a one-time on-site visit in a pain management setting (3 hours)	
	<i>Methods/Design:</i>	Didactic (2 hours) case-based problem solving focusing on clinical pearls each week and one-time on-site visit in a pain management setting (3 hours)	
	<i>Significant Results & Outcomes:</i>	This elective course was highly rated by students and consistently received excellent reviews	
	<i>Dissemination:</i>	Handouts for the core lectures were shared with the UC San Diego pharmacy residents and were available as references during clinical rotations	

Lectures

International

<i>Date</i>	<i>Role</i>	<i>Topics</i>	<i>Program</i>
05/09	Educator	1. Managing Anxiety 2. Treating Depression	San Diego Hospice and the Institute for Palliative Medicine Slovenia Palliative Medicine Palliative Care Development Institute Ljubljana Golnik, Slovenia
04/21	Facilitator, Model with Simulated Patient	1. Pathophysiology and Management of Bone, Abdominal, and Neuropathic Pain 2. Loss, Compassion Fatigue, Burnout, and Resilience 3. Difficult Decision-Making: Fluids and Nutrition, Antibiotics	American Society of Clinical Oncology International Palliative Care Interdisciplinary Curriculum TaTa Memorial Hospital e-Course Mumbai, India
06/24	Facilitator	Communicating Prognosis Effectively	American Society of Clinical Oncology International Palliative Care e-Course Indonesia

National

<i>Date</i>	<i>Role</i>	<i>Topics</i>	<i>Program</i>
