Shih-Yuan (SY) Wang · 12:48 PM

Dear James,

W&Wsens Devices Inc. based in Los Altos California, has developed Silicon and Germanium on Silicon Photodetectors compatible with CMOS technology for high speed, high efficiency optical data communications. Our technology is also applicable to monolithically integrated LiDAR solutions (time-of-flight photo-sensor / 3D imaging). We are currently engaging in M&A discussions and are being represented by Bank of America Merrill Lynch headed by Marco Chisari.

James Schuessler • 10:48 AM

Hi SY,

James Schuessler • 10:49 AM

Jonathan Charles and Peter Deane are both connected into the same venture and M&A teams as I am within Samsung. Peter is the best technical contact and JC is the best for the financial side. I hope you can find a buyer who will fully utilize your team's work. Jim

Shih-Yuan (SY) Wang • 11:14 AM

Hi James,

Great, and thanks for the direction to Jonathan and Peter - I will connect with them. Please feel free to share this material as well.

Best,
SY
