Patents

Method for processing data associated with location area update in a wireless communication system

Method and apparatus for controlling transmission power of reverse link carriers in multi-carrier wireless system

Method for processing data associated with location area update in a wireless communication system

Network coding enhancements

Method and apparatus for multiplexing multiple reverse feedback channels in multi-carrier wireless networks

Li-Hsiang Sun

Staff Engineer at Interdigital
San Diego, California, United States

Summary

Standards delegate to IEEE 802.11 WG

Standard activities participation:

802.11ay (2015~present)

3GPP Core Network CT1 (2009~2012)

CDMA2000 Air Interface Standards (EV-DO, UMB, 2004~2008)

Programming Skills:

C++, Java, Javascript, Perl, Python

Experience

InterDigital Communications

Senior Staff Engineer

June 2012 - Present (13 years 10 months)

San Diego, CA

LG

Senior Staff Engineer

October 2004 - June 2012 (7 years 9 months)

San Diego, CA

Participate and contribute to 3GPP, 3GPP2 standards

Education

Ph.D., Electrical Engineering · (1996 - 2002)
