

Dependent Claims 2-5, 7 of '024 Patent	Dependent Claims 9-12, 14 of '024 Patent	Dependent Claims 16-18, 20 of '024 Patent
<p>2. The system of claim 1, further comprising a wheel sensor that is coupled to the hardware processor and that enables the hardware processor to determine that the roulette wheel has been spun.</p>	<p>9. The method of claim 8, further comprising using a wheel sensor that is coupled to the hardware processor to determine that the roulette wheel has been spun.</p>	<p>16. The non-transitory computer-readable medium of claim 15, wherein the method further comprises using a wheel sensor that is coupled to the hardware processor to determine that the roulette wheel has been spun.</p>
<p>3. The system of claim 1, wherein the hardware processor is further configured to close bets when the roulette wheel and the ball are determined to have been spun.</p>	<p>10. The method of claim 8, further comprising closing bets when the roulette wheel and the ball are determined to have been spun.</p>	
<p>4. The system of claim 1, further comprising a display adjacent to the roulette wheel that indicates the first selected position.</p>	<p>11. The method of claim 8, further comprising indicating the first selected position on a display adjacent to the roulette wheel.</p>	<p>17. The non-transitory computer-readable medium of claim 15, wherein the method further comprises indicating the first selected position on a display adjacent to the roulette wheel.</p>
<p>5. The system of claim 4, wherein the hardware processor is further configured to cause a lightning visual effect to be presented when in connection with indicating the first selected position.</p>	<p>12. The method of claim 11, further comprising causing a lightning visual effect to be presented when in connection with indicating the first selected position.</p>	<p>18. The method non-transitory computer-readable medium of claim 17, wherein the method further comprises comprising causing a lightning visual effect to be presented when in connection with indicating the first selected position.</p>

Dependent Claims 2-5, 7 of '024 Patent	Dependent Claims 9-12, 14 of '024 Patent	Dependent Claims 16-18, 20 of '024 Patent
<p>7. The system of claim 1, wherein the hardware processor is further configured to: randomly select a second selected position on the roulette wheel; and determine a payout for the second selected position that is different than the payout for the first position.</p>	<p>14. The method of claim 8, further comprising: randomly selecting a second selected position on the roulette wheel; and determining a payout for the second selected position that is different than the payout for the first position.</p>	<p>20. The non-transitory computer-readable medium of claim 15, wherein the method further comprises: randomly selecting a second selected position on the roulette wheel; and determining a payout for the second selected position that is different than the payout for the first position.</p>
