# Roulette

Roulette is recognized as the oldest and most popular form of gaming in Europe today. In the late 1800's, Charles Welles became the most famous gambler in history. He boasted an apparent system on the wheel to "break the bank at Monte Carlo." Since then many methods have been tried to predict the next winning number, varying from exotic systems to birthdates of favorite relatives.

Caesars is proud to offer Roulette in two variations. In addition to the popular European style roulette game with 36 numbered slots, a 0 and a 00, we also offer our high stakes French Roulette, which has only a single 0 along with the standard 36 numbers, and is a favorite among our international customers.

Each player buys chips of a different color from the dealer. Their value is determined at the time of purchase. When play is completed the chips must be redeemed prior to leaving the game. Bets may be placed until the ball slows or the dealer calls "no more bets." It is the player's responsibility to place chips properly on the layout. Please refer to the diagram for bet placements and corresponding payouts.

When the winning number has been determined and marked, the dealer clears the losing bets from the layout, and the winning bets are paid. Bets for the next spin may be placed only after all winners are paid.

## Roulette Betting Chart

Outside Bets		
Example	Odds	Position on Layout
