

TOP HAT™

twenty - one

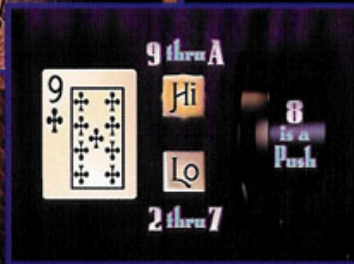

Key Features

- Strong high denomination (\$1 and up) performer
- Elegant Video Blackjack game
- Expected Hold of 4% to 5%
- Incremental Revenue

With casino floors seemingly being filled to capacity with low-denom products, it's good to know that strong performance is still possible with dollar machines. Top Hat 21™ was among the most popular of the original Odyssey games, and now as a dedicated machine is proving to be a brilliant solution to the operator plight of "too many nickels!"

Players love the way Top Hat plays, and will sit on machines for hours. Coin-in is surprisingly good -- expect between \$3 to \$4 per proposition, with high initial buy-in.

Diversify your floor with Top Hat 21™ and watch with satisfaction as you drive great win/day numbers on a machine that provides significant labor savings, bolsters your dollar and five dollar denomination averages, and produces incremental revenue by adding in non-traditional slot players to your customer base.
