

Independent Claim 1 of '024 Patent	Independent Claim 8 of '024 Patent	Independent Claim 15 of '024 Patent
<u>Preamble:</u> A system for wagering, comprising:	<u>Preamble:</u> A method for wagering, comprising:	<u>Preamble:</u> A non-transitory computer-readable medium containing computer executable instructions that, when executed by a processor, cause the processor to perform a method for wagering, the method comprising:
<u>Element 1:</u> a roulette wheel;		
<u>Element 2:</u> a ball configured to be used in the roulette wheel;		
<u>Element 3:</u> a hardware processor configured to:		
<u>Element 4:</u> receive first bet information for a first bet from a first player device of a first player on a spin of the roulette wheel, the first bet information corresponding to at least a first position on the roulette wheel;	<u>Element 1:</u> receiving, using a hardware processor, first bet information for a first bet from a first player device of a first player on a spin of a roulette wheel, the first bet information corresponding to at least a first position on the roulette wheel;	<u>Element 1:</u> receiving first bet information for a first bet from a first player device of a first player on a spin of a roulette wheel, the first bet information corresponding to at least a first position on the roulette wheel;
<u>Element 5:</u> receive second bet information for a second bet from a second player device of a second player on the spin of the roulette wheel, the second bet information	<u>Element 2:</u> receiving, using the hardware processor, second bet information for a second bet from a second player device of a second player on the spin of the roulette	<u>Element 2:</u> receiving second bet information for a second bet from a second player device of a second player on the spin of the roulette wheel, the second bet information

corresponding to at least a second position on the roulette wheel that is different from the first position;	wheel, the second bet information corresponding to at least a second position on the roulette wheel that is different from the first position;	corresponding to at least a second position on the roulette wheel that is different from the first position;
<u>Element 6</u> : determine that the roulette wheel and the ball have been spun for the spin of the roulette wheel;	<u>Element 3</u> : determining, using the hardware processor, that the roulette wheel and a ball on the roulette wheel have been spun for the spin of the roulette wheel;	<u>Element 3</u> : determining that the roulette wheel and a ball on the roulette wheel have been spun for the spin of the roulette wheel;
<u>Element 7</u> : randomly select a first selected position on the roulette wheel for the spin of the roulette wheel prior to the ball falling into a position on the roulette wheel, wherein the first selected position is the same as the first position;	<u>Element 4</u> : randomly selecting, using the hardware processor, a first selected position on the roulette wheel for the spin of the roulette wheel prior to the ball falling into a position on the roulette wheel, wherein the first selected position is the same as the first position;	<u>Element 4</u> : randomly selecting a first selected position on the roulette wheel for the spin of the roulette wheel prior to the ball falling into a position on the roulette wheel, wherein the first selected position is the same as the first position;
<u>Element 8</u> : determine a first payout for first position and a second payout for the second position for the spin of the roulette wheel, wherein the first payout is higher than the second payout;	<u>Element 5</u> : determining, using the hardware processor, a first payout for first position and a second payout for the second position for the spin of the roulette wheel, wherein the first payout is higher than the second payout;	<u>Element 5</u> : determining a first payout for first position and a second payout for the second position for the spin of the roulette wheel, wherein the first payout is higher than the second payout;
