Lightning Roulette

Our unique Lightning Roulette is like no other Roulette game. Not only is it visually stunning, but it also adds RNG Lucky Number wins to every game round.

All the familiar elements of our world-class Live Roulette are here — the live wheel, the live dealer, and the full line-up of Roulette bets.

But Lightning Roulette adds a whole lot more for an electrifying experience. In each game round, between one and five Lucky Numbers are struck by lightning and given multiplied payouts of between 50x and 500x.

With its involving game show-style environment with advanced sound and lighting effects, Lightning Roulette is a unique and electrifying spin on traditional Roulette.

Lucky Numbers and Lucky Payouts

The objective of Lightning Roulette is to predict the number on which the ball will land by placing one or more bets that cover that particular number.

The wheel includes the numbers 1-36 plus a single zero. Many different bets are available, they can cover a single number or a certain range of numbers, and each type of bet has its own payout rate.

The ball is spun automatically by an Auto Roulette wheel, and the game presenter will pull a lever to initiate the generating of Lucky Numbers after betting time has expired.

The ball will eventually come to rest in one of the numbered pockets on the wheel. You win if you placed a bet that covers that particular winning number. If the winning number is among the randomly selected Lucky Numbers and is covered by a Straight Up bet, then the bet is multiplied by the Lucky Payout (random multiplier).

Non-multiplied Straight Up Bets pay 29:1. All other bets such as splits, corners, red/black and dozens pay the same as standard Roulette.
