

AFFIDAVIT OF MINA CHING

1. I am a Records Request Processor at the Internet Archive. I make this declaration of my own personal knowledge.
2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.
3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to browse more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a display of available dates. The visitor may select one of those dates, and begin browsing an archived version of the Web. Links on archived files in the Wayback Machine point to other archived files (whether HTML pages or other file types), if any are found for the URL indicated by a given link. For instance, the Wayback Machine is designed such that when a visitor clicks on a hyperlink on an archived page that points to another URL, the visitor will be served the archived file found for the hyperlink's URL with the closest available date to the initial file containing the hyperlink.
4. The archived data made viewable and browseable by the Wayback Machine is obtained by use of web archiving software that automatically stores copies of files available via the Internet, each file preserved as it existed at a particular point in time.
5. The Internet Archive assigns a URL on its site to the archived files in the format `http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]` aka an "extended URL". Thus, the extended URL `http://web.archive.org/web/19970126045828/http://www.archive.org/` would be the URL for the record of the Internet Archive home page HTML file (`http://www.archive.org/`) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). The date indicated by an extended URL applies to a preserved instance of a file for a given URL, but not necessarily to any other files linked therein. Thus, in the case of a page constituted by a primary HTML file and other separate files (e.g., files with images, audio, multimedia, design elements, or other embedded content) linked within that primary HTML file, the primary HTML file and the other files will each have their own respective extended URLs and may not have been archived on the same dates.

6. Attached hereto as Exhibit A are true and accurate copies of browser screenshots of the Internet Archive's records of the archived files for the URLs and the dates specified in the attached coversheet of each screenshot. The dates specified in the attached coversheet of each printout indicate an archival date on or before October 19, 2012.
7. I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

**Description**

As global energy consumption grows at exponential rates, so does the demand for energy solutions that are both more environmentally responsible and more efficient. The DuroMax XP4400EH has a dual fuel system that operates on either standard gasoline or cleaner burning liquid propane which can more than double you generator's run time.

With the XP4400EH, operating on propane will not gum up or foul your generator's carburetor, and will give you quick, reliable starts every time. It only takes a few seconds to switch over from regular gas to propane, and with the flexible line, you can easily hook up any size propane tank including the one from your barbecue. Unlike gasoline, propane can be stored for years without going bad.

FEATURES

- Clean running propane will not gum up or foul the carburetor for quick and reliable starts every time.
- Unlike gasoline, liquid propane can be stored for years.
- Flexible line allows for connecting to tanks of any size.
- Designed to run on gasoline or propane for maximum convenience.
- Durable DuroStar 7.0 Hp, air cooled with low oil shutoff.
- Heavy duty steel frame with four point fully isolated motor mounts for smooth and quiet operation.
- Electric Key Start for easy starting when you need it.
- Wheel kit w/ front handle for easy transporting.
- Full power panel with engine shutoff switch, volt meter, circuit breaker and power outlets.
- (2) Fully protected 120V outlets & (1) 120V/240V twist-lock outlet.
- Approximately 20 Hours run time (propane) 8 Hours run time (gasoline)
- All steel 4 gal. fuel tank with ez-read gauge.
- Low oil shut-off protects engine.
- Super quiet muffler reduces engine noise.
- Idle control holds RPM at a constant level even under heavy loads for fuel savings and noise reduction

SPECIFICATIONS

Runs both gasoline and propane

Full featured power panel
