Flexible Fueling Options for your Portable Power Needs

By Ben B. *Powermate Marketing Communications*

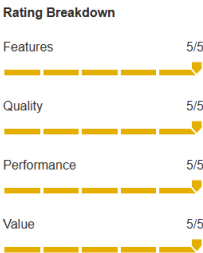

Review Posted 01/31/2017

Powermate's 3500 watt Dual Fuel Series portable generator offers the convenience and versatility of two fueling options: liquid propane (LPG) or gasoline. With a simple turn of the unit's fuel selector dial, users are able to toggle between either fuel source. Equipped with useful features like electric start capabilities, a digital multimeter that tracks engine run time for required maintenance, and a low oil shutdown feature that helps prevent engine damage, these units provide flexible fueling options and dependable power whether you're at home or on the road.

Issues Running On Propane, Still In Shop

By Charles R. *Milford, Pennsylvania*

Purchased 05/23/2020 | Review Posted 07/07/2020

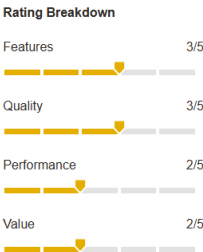

Generator ran for about 20 minutes on propane. Will not run now. Will run on gasoline, but I need the propane feature. Two shops suggested by Generac would not work on Dual fuel. At third shop now, still waiting. Need to know by this friday as the plan was to use it with my RV and we plan to leave on vacation in 10 days.

Charles R. Does Not Recommend This

Cons:
NOT running on propane

GENERAC 10 kW

By Fred M. Tyrone, New Mexico

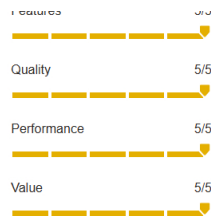

Purchased 05/07/2020 | Review Posted 06/24/2020

Great feature is that it runs either propane or gasoline! Gas tank holds about 2 gallons! I'm guessing it would run all night long! I've got the electric start! Works very well! Usually kicks off with no problem! I like the feature of a starter on-off switch with a separate on-off for the battery! It's nice just to have it around the house in case of any power outages! I use it to keep from rolling out a 150 feet of power cord for my electric weed eater! It is quite heavy, but wheels make it manageable to move around! I picked this particular one because of the middle of the road price!

Great Generator That Is Duel Fuel

By Bob U. Oronoco, Minnesota

Review Posted 06/23/2019

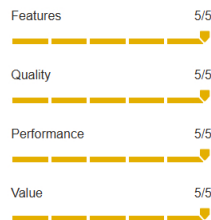

We recently sold our 32 foot motorhome that had an onboard generator and went with a pick up in a 33 foot Camper We purchased this generator to run the air conditioner as well as other power on our trailer when we are not hooked up at a campground it has worked flawlessly and we love the dual fuel option I would recommend this generator to anybody

Great Machine. Reliable, Propane From Lg Home Tank Allows No Wo

By Jeff S. Waldo, Florida

Purchased 09/18/2017 | Review Posted 05/05/2019

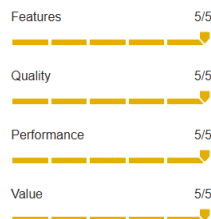

We are able to keep out refrigerator operating, computer and router, TV entertainment system and plug in lights using just two 20 ft extension cords an adapters. It is a bit loud but 100 ft from the house is barely noticeable. If the wattage is within your desired range. buy THIS unit. You won't go wrong.

The Duel Fuel We Have Wanted

By Alan S. Chino Valley, Arizona

Purchased 05/22/2018 | Review Posted 06/13/2018

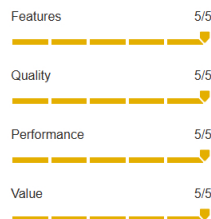

Yes, it is a keeper. Read the book before you put it together, do as it instructs. Run it for an hour neighbors said nothing about it. Run the AC and microwave OK for the RV. Thank you for a good product.

Can't Find A Fault!

By Jeff S. Waldo, Florida

Purchased 09/18/2017 | Review Posted 10/28/2017

The generator is the best of both design and functionality I have seen. Although it was purchased after Hurricane Irma, and it has not run but for about 20 minutes so far, it seems to do the job very capably with my side-by-side refrigerator. Will have a full report when we need it for a week. (Hope not to have to)

This Unit Fits Our Needs Very Well

By James S. Ft Lauderdale, Florida

Purchased 09/18/2017 | Review Posted 10/09/2017

Overall size/portability was a primary consideration. The 6957 is comparably light and compact while still providing all the power we need.

Dual Fuel Is The Best Option

By William L. HUNTINGTON STATION, New York

Purchased 09/10/2017 | Review Posted 10/05/2017

The generator started after I open the box and filled it with the oil that came in the package, without any problems with gasoline and LP.
