## 五、創作說明：

### 【物品用途】

可供嬰幼兒乘坐，並以人力推拉行駛。

### 【創作特點】

本創作嬰兒車骨架係由主車架與副車架構成，主車架在後側略呈人形，主車架中間與後輪腳架之間具有一圓形關節，以供展開或收合；副車架則在前側，略呈L形，前端並具有一輔助輪，使本創作形成有五輪併立狀態。

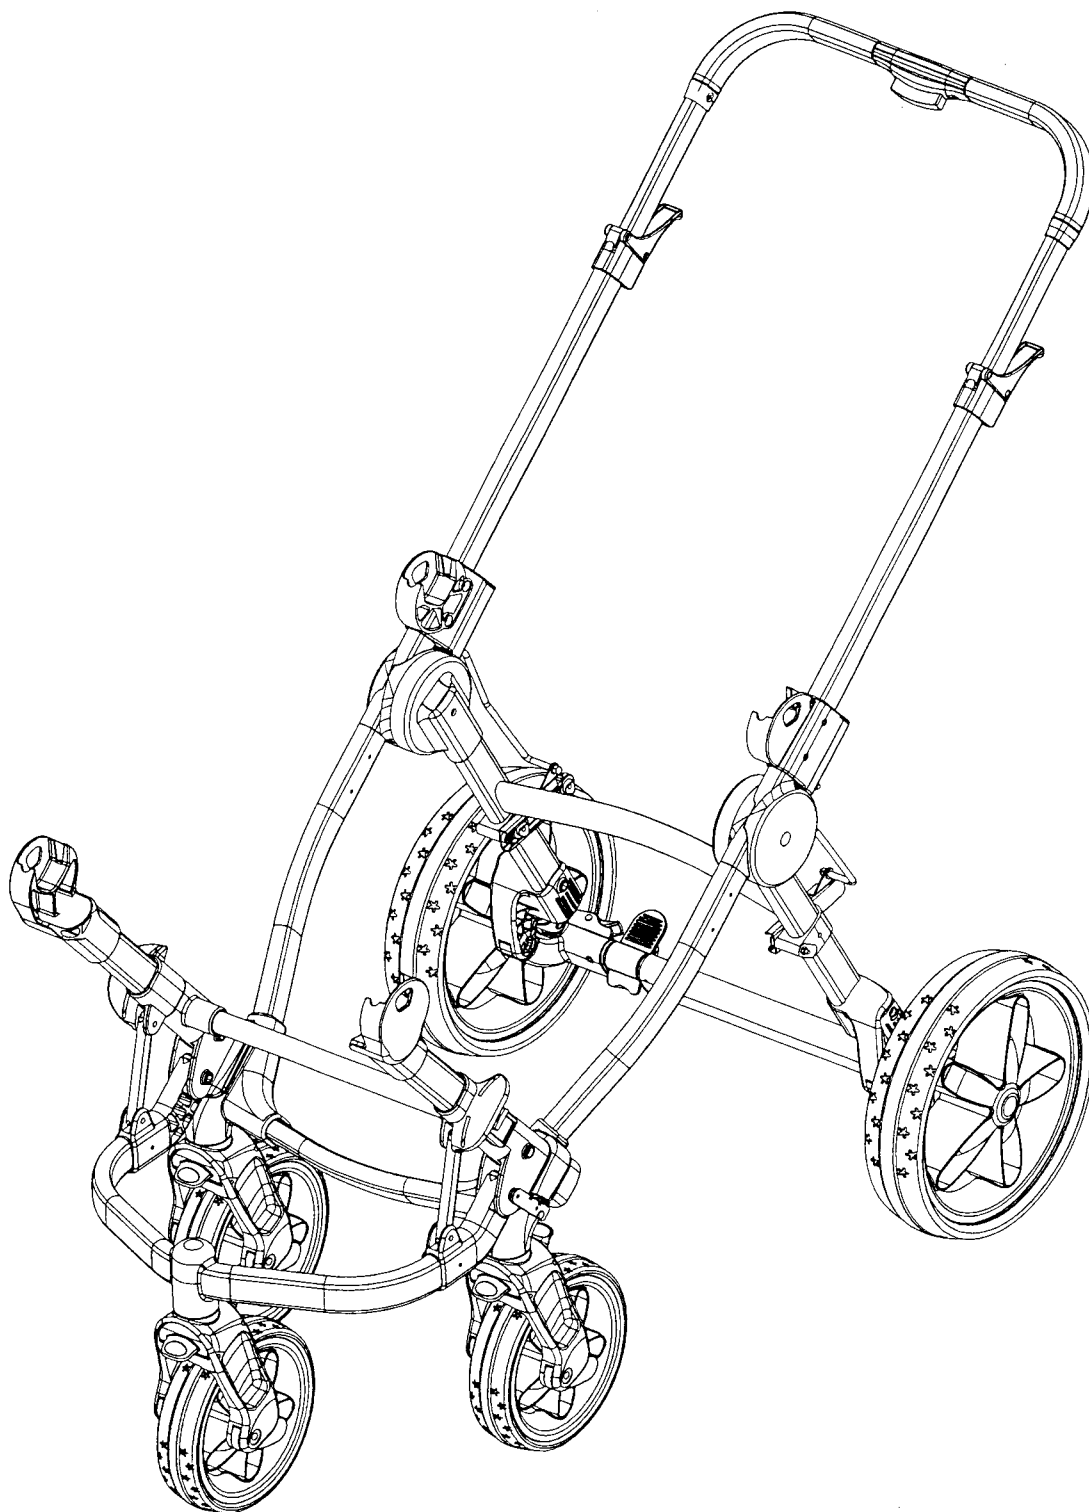

另外，本創作可在主車架後側下端裝設置物籃，另外可在主、副車架上兩側各具有一組結合機構，俾可加裝安全座椅、提籃、座艙、滑板等配備，而可供2~4人的嬰幼兒搭載，如第八~十三圖所示。

綜觀本創作整體造型，不但新穎獨特，且前後均衡又穩重大方，實充滿了穎異獨特之形象，及平穩耐用之視覺感觀，誠為一極具創意性又兼具美感與實用之產品設計，爰依法提出新式樣專利申請。

## **Baby Stroller Frame**

## Abstract

---

### [Purpose of the Article]

Available for infants and young children to ride, and can be driven by manual push and pull.

### [Features of the Invention]

The baby stroller frame of the present invention is composed of a main frame and a sub-frame, the main frame is slightly herringboned at the rear, a circular articulation is provided between the middle of the main frame and the rear wheel stand for unfolding and folding; the sub-frame is located at the front and somewhat L-shaped, the front end thereof is provided with an auxiliary wheel such that the present invention is five-wheeled.

Moreover, the present invention can be equipped a storage basket at the lower end of the rear of the main frame; also, both sides of the main frame and sub-frame can each be provided with a set of connection structures so that equipment such as safety seat, hand basket, cabin, skate board, etc can be additionally installed as shown in Figures 8~13, thereby enabling it to carry 2~4 infants/young children.

The overall design of the present invention is not only novel and unique, but the front and rear are also balanced and steady and noble. It is indeed full of extraordinarily intelligent and unique images, and visual perception of stability and durability, and it is a product design that is extremely innovative, aesthetic and practical, hence an application for industrial design patent is submitted in accordance with the law.
