

YouCam 3 YouTube Transcript

Start Time	Transcript
00:05	Fun webcam effects software YouCam is now out in version 3. Packed with heaps of effects for chatting online and recording videos, YouCam is a photo and video booth in the one application.
00:20	YouCam 3 includes all kinds of unforgettable effects and styles, and face tracking technology makes sure you always stay in sharp. Headgear gadgets use face tracking to keep masks, hats, and moody effects exactly where you are. Scenes put you in places all over the world, while avatars, frames, filters, and other effects are a whole lot of fun.
00:46	Emotion effects can now be applied directly on the video exactly where you want them to appear--Just click on the spot. Thousands more effects are available free to download from CyberLink DirectorZone website.
01:02	When your recording is done, videos can be uploaded to Facebook and YouTube directly, or you can email photos and videos directly to friends. There are already thousands of videos on YouTube that have been uploaded via previous versions of YouCam.

01:19	<p>YouCam is also about recording videos and photo snapshots, and there are a number of modes to use. You can record effects live, or you can schedule a time to start your recording. YouCam includes motion detection technology: You can use your webcam for home surveillance. An auto email feature will let you know when someone has been caught on video.</p>
01:45	<p>YouCam is also a great tool for making live presentations. Previously, you could share PowerPoint files and photos while you chat. Now, you can also show what's going on on your desktop with a new desktop capture mode.</p>
02:01	<p>Freehand drawing tools and a refreshed lineup of stamps are perfect for sharing your ideas while you chat.</p>
02:10	<p>YouCam 3 has been designed for the latest PC Hardware including touch systems, HD webcams, and ultra-light netbooks.</p>
02:19	<p>A trial version is now available from CyberLink.com, and you can download today.</p>
