2 At a Glance

Ten years before Bitcoin was created, I formalized the notion of Proof of Work and described its use for mining of crypto payments. I later developed energy-efficient alternatives to this paradigm, and showed how to enable mining on mobile devices, which is not possible for Bitcoin. I am the founder of the academic discipline of phishing and have developed techniques to predict fraud trends years before they emerge, enabling countermeasures to be developed before they are needed. I developed the notion of implicit authentication, which is now ubiquitous; I also founded a company that developed the first retroactive virus detection technology, with guarantees of detection; the company was acquired by Qualcomm in 2013. I have worked as chief scientist and similar positions in startups as well as industry behemoths, such as PayPal. I have several hundred patents to my name and am a prominent security researcher with hundreds of peer reviewed publications and an array of textbooks. My 1997 PhD thesis, from University of California at San Diego, was on distributed electronic payment systems with revocable privacy.

3 Work History (Highlights)

1. **Member of Technical Staff, Bell Labs (1997-2001).** Markus was part of the security research group at Bell Labs. He formalized the notion of *proof of work*, later an integral part of BitCoin.
2. **Principal Scientist, RSA Labs (2001-2005).** Markus posited that phishing would become a mainstream problem, and developed ethical techniques for identifying likely trends based on human subject experiments.
3. **Associate Professor, Indiana University (2005-2008).** Markus was hired to lead the newly formed security group at Indiana University, and

created a research group comprising approximately 10 professors and 30 students, studying social engineering and fraud.

4. **Principal Scientist, Xerox PARC (2008-2010)**. Markus was hired to lead the research efforts of the Xerox PARC security group, and developed the notion of *implicit authentication*, a technology that is now ubiquitous.
5. **Principal Scientist, PayPal (2010-2013)**. Markus did research on security and user interfaces, and developed techniques to reduce the losses associated with *liar buyer fraud*.
6. **Senior Director, Qualcomm (2013-2016)**. Qualcomm acquires FatSkunk, a company founded by Markus. At FatSkunk, Markus developed *retroactive* malware detection with provable security guarantees. A simplified version of this is now deployed with almost all Qualcomm chipsets.
7. **Chief Scientist, Agari (2016-2018)**. Markus developed a technique to acquire fraudster intelligence by compromising scammer email accounts – *while staying within the law* – resulting in the extradition of several African scam lords to the U.S.
8. **Chief of Security and Data Analytics, Amber Solutions (2018-2020)**. Markus developed usable configuration methods supporting improved security and privacy for IoT installations.
9. **Chief Scientist, ByteDance (2020-2021)**. Markus oversaw the establishment of a research group and a research agenda at ByteDance, and contributed to their intellectual property and product security.
10. **Chief Scientist, Artema LABS (2021-)**. Managing the research, product strategy, and patent strategy for Artema LABS, a Los Angeles based startup in the Crypto/NFT sector.
