ENVIROTECH

WELCOME TO ENVIRO TECH

Enviro Tech is located in the heart of California's Central Valley, about 80 miles east of San Francisco. We originated in 1991, primarily serving the food processing industry, and have since shifted focus to developing new EPA and FDA regulated chemistries and novel solutions.

Our mission has always been to develop and manufacture top of the line products for various industries, offering non-traditional alternative chemistry with a focus on environmental compliance and effectiveness with a conscience. As Enviro Tech continues to grow and expand, the primary focus continues to be customer service and technical support.

We are one of the few manufacturers of [peracetic acid](#) in the United States, and we maintain four parent EPA-registered PAA formulas and three FDA approved PAA formulas which are manufactured and distributed from: Modesto, CA; Helena, AR; and Joliet, IL. In addition, we manufacture stabilized bromine products at our Modesto facility.

Combined with a GLP compliant analytical and Q.C. laboratory, we are staffed to perform nearly any service on analysis that may be required by our varied customers.

BREAKING NEWS!

Enviro Tech's patent for on-site generation of peracetic acid has been awarded, and can be read [here](#). Enviro Tech will be employing this technology in our product Coronis.

Enviro Tech is located in the heart of California's Central Valley, about 80 miles east of San Francisco. We originated in 1991, primarily serving the food processing industry, and have since shifted focus to developing new EPA and FDA regulated chemistries and novel solutions.

Our mission has always been to develop and manufacture top of the line products for various industries, offering non-traditional alternative chemistry with a focus on environmental compliance and effectiveness with a conscience. As Enviro Tech continues to grow and expand, the primary focus continues to be customer service and technical support.

We are one of the few manufacturers of paracetic acid in the United States, and we maintain four parent EPA-registered PAA formulas and three FDA approved PAA formulas which are manufactured and distributed from: Modesto, CA; Helena, AK; and Joliet, IL. In addition, we manufacture stabilized bromine products at our Modesto facility.

Combined with a GLP compliant analytical and Q.C. laboratory, we are staffed to perform nearly any service on analysis that may be required by our varied customers.

BREAKING NEWS!

Enviro Tech has been granted FCN# 1384 for the Coronis product. Effective March 6, 2014, Coronis can be used at up to 400 ppm on whole or cut meat products, 1000 ppm on whole or cut poultry products, 2000 ppm in poultry post-chiller or dip tanks prior to air chillers, and 350 ppm on fruits and vegetables.

August 28, 2014 – Enviro Tech's FCN list

The screenshot shows the Enviro Tech website interface. At the top, there is a navigation menu with links for HOME, MSDS/TECH DATA, LABELS, CONTACT US, and SEARCH. Below the menu is a banner image featuring various fresh vegetables like tomatoes, cucumbers, and corn, with the Enviro Tech logo overlaid. The main content area is titled 'FOOD CONTACT NOTIFICATIONS' and contains a list of ECN numbers and their corresponding descriptions. The list includes:

- ECN 447: Increases the level of peroxide allowable in produce wash water to 120 ppm.
- ECN 641: 30 ppm PAA in lactose manufacturing.
- ECN 699: 190 ppm PAA in water and ice for seafood.
- ECN 879: 15 ppm PAA in whey protein concentrate.
- ECN 887: 220 ppm PAA on meat and poultry.
- ECN 908: 220 ppm PAA on RTE meat and poultry products.
- ECN 1132: 1000 ppm PAA on poultry, 400 ppm on meat.
- ECN 1419: 2000 ppm PAA in post-main chiller secondary processing, and pre-air chiller dip tanks.

Below the list, there are sections for 'FREQUENTLY ASKED QUESTIONS', 'PERASAN A', 'BIOSIDE HS 15%', 'PERASAN MP-2', 'REFLEX', 'PERASAN C5', 'MISC REPORTS', 'FOOD CONTACT NOTIFICATIONS', 'HB2 AND OTHER BROMINE PRODUCTS', 'ENVIRO KLOR', and 'KOSHER CERTIFICATIONS'.
