THIS IS AN **ARCHIVED VERSION** OF THE JCT-VC PAGE FOR THE 2013-2016 STUDY PERIOD. PLEASE SEE THE **UPDATED VERSION** [HERE](#).

The Joint Collaborative Team on Video Coding (JCT-VC) is a group of video coding experts from ITU-T Study Group 16 (VCEG) and ISO/IEC JTC 1/SC 29/WG 11 (MPEG) created in 2010 to develop a new generation video coding standard that will further reduce by 50% the data rate needed for high quality video coding, as compared to the then state-of-the-art AVC standard (ITU-T Rec. H.264 | ISO/IEC 14496-10).

This new coding standardization codec is called High Efficiency Video Coding (HEVC) and is published as twin text by ITU, ISO and IEC as [ITU-T H.265](#) | [ISO/IEC 23008-2](#).

ITU-T Rec. H.264 | ISO/IEC 14496-10, commonly referred to as H.264/MPEG-4-AVC, H.264/AVC, or MPEG-4 Part 10 AVC has been developed as a joint activity within the [JVT](#).

The JCT-VC is co-chaired by Jens-Rainer Ohm and Gary Sullivan, whose contact information is provided below.
