

Qi STANDARD

Qi: Mobile charging empowered

Wireless charging for consumer devices. Initially launched as Qi Certified products, global benchmark for interoperability.

Qi2 v2.2.1, branded as Qi2 25W and launched in July, 2025, are taking wireless charging to the next level delivering fast, more convenient and more energy efficient wireless charging.

WPC has changed how the world charges mobile devices. Belkin, one of the world's largest makers of Qi charging devices, has been working with WPC for nearly a decade. We are honored to be part of the charging revolution alongside WPC.

Steve Malony, CEO
Belkin International, Inc.

Certified for excellence

To be Qi Certified, products undergo rigorous testing for safety and interoperability in one of our independent authorized testing laboratories before being granted permission to use the Qi or Qi2 logo. Only Qi Certified products can display the Qi or Qi2 logo, a reassurance of safety and interoperability. In short, that your devices will work just as expected.

Introducing Qi2

Introducing Qi2

Qi2 brought faster 15W charging to mobile devices certified for interoperability and safety. Qi2 devices feature magnetic attachment technology which aligns devices and chargers

Sustainable

Worn out cables and broken charging ports are two of the most common quality issues with smartphones, requiring either new charging cables or new phones. Qi2 devices

Future-ready

Qi2 and Qi2 25W with magnetic support innovative cases and new accessories that magnetically attach to the back of a smartphone

perfectly for improved energy efficiency, faster charging, and easier usability. Qi2 25W builds on the convenience and energy efficiency of Qi2 while delivering nearly 70% more charging power for faster charging. In fact, Qi2 25W can safely charge a smartphone battery from 0 to 50% in about 30 minutes.

don't have cables to wear out or create mechanical stress on charging ports, thus reducing electronic waste in landfills.

Testing

TESTING

Independent test labs around the world are at the heart of our certification process.
